POSNA
PEDIATRIC ORTHOPAEDIC SOCIETY
OF NORTH AMERICA
Children’s Mercy Kansas City is proud to announce the creation of the Department of Orthopaedic Surgery and Musculoskeletal Science. This change reflects the scope and the depth of services we provide. With over 150 members on our orthopaedic team, including 17 faculty and 25 advanced practice nurses, we are able to focus on all aspects of pediatric orthopaedics. Our hand, spine and sports medicine divisions offer further expertise in each field. Recently, we entered into a first-of-its-kind partnership between a children’s hospital, a national sports federation and a professional sports team, creating a new sports medicine center including a custom-built, state-of-the-art human performance lab. Our focus on improving outcomes for kids helps us find answers to the pediatric orthopaedic questions that matter today.

The Children’s Mercy Department of Orthopaedic Surgery and Musculoskeletal Science congratulates Richard Schwend, MD, on his role as President of POSNA.

For more on how we’re providing answers, visit childrensmercy.org/POSNA

Richard Schwend, MD, Director of Orthopaedic Research

ABOUT POSNA

The Pediatric Orthopaedic Society of North America (POSNA) is a group of professionals comprised mostly of pediatric orthopaedic surgeons. We are board certified in orthopaedic surgery and have participated in additional training to become specialized in the care of children's musculoskeletal health and our practice reflects this dedication.

We, as a group, strive to become the authoritative source on such care through appropriate research that will lead to the best evidence-based patient care.

POSNA MISSION STATEMENT

To improve the care of children with musculoskeletal disorders through education, research, and advocacy.

CONNECT WITH POSNA DURING THE MEETING AND SHARE YOUR EXPERIENCES

#POSNA2018

@POSNA_org  Pediatric Orthopaedic Society of North America (POSNA)
Websites:  POSNA.org and orthokids.org
Dear Colleagues,

On behalf of our local co-hosts Jay and Shannon Shapiro and John and Jeannette Williams, our Program Chair Jeffrey Sawyer, our Executive Director Teri Stech and her staff, as well as the numerous POSNA volunteers who have worked to make this meeting a success, we welcome you to Austin for the 2018 POSNA Annual Meeting and Pre-Course. The meeting will be at the new JW Marriott in the heart of downtown Austin, from May 9 to 12, 2018.

The meeting begins Wednesday morning with the Pre-Course entitled: “Natural History in Pediatric Orthopaedics: How Good is the Data on Which We Base our Decisions?”, developed and chaired by Wuldbhav (Woody) Sankar. The scientific sessions begin Wednesday afternoon, and will conclude on Saturday afternoon. There was a record 865 submitted abstracts, graded by the program committee (Jeffrey Sawyer, Anthony Stans, Michelle Caird and Jeffrey Martus) and 150 POSNA member volunteers, resulting in 169 podium presentations, 19 posters and 81 ePosters. The program committee, chaired by Jeffrey Sawyer, has worked hard and created THE premier pediatric orthopaedic educational event.

The Opening Ceremony, which will take place on Wednesday evening, is highlighted with the Howard Steel Lecture presented by Mr. Evan Smith, Chief Executive Officer of The Texas Tribune “The Future is Texas (Unless We Screw It Up)”. The Opening Ceremony also allows us to recognize our industry partners who have contributed to POSNA in the past year. The Awards Committee has selected Lynn T. Staheli for the Humanitarian Award and Derek M. Kelly for the Special Effort and Excellence Award, to be presented Wednesday evening. A cocktail welcome reception will follow the Opening Ceremony.

The awards committee has selected Jim Roach for the Distinguished Achievement Award, which will be presented on Thursday morning. The Symposia Program will take place Thursday afternoon and includes programs from POPS and COUR, as well as topics on Telemedicine, Evidence Based Practice, the Opioid Epidemic and a special symposium on member health and wellness, in which spouses are encouraged to join. The Fourth Annual Arabella Leet, MD Young Member Forum will be Thursday afternoon and is moderated by Marty Herman. Thursday evening, as always, is reserved for family, friends and fellowship reunions, with a wide variety of outstanding restaurants to experience in Austin.

Friday morning’s scientific session will include the basic science and clinical awards papers. Michael B. Millis will be the Presidential Speaker and will be sharing his perspective from a lifetime of experience as a leader, thinker and mentor in pediatric orthopaedics. Friday morning will also be the presidential transfer, to incoming POSNA President, Steve Frick. The Friday Subspecialty Day sessions will run after lunch and will include sessions on Hip, Trauma, Lower Extremity/Neuromuscular, Upper Extremity, Spine, and Sports. The closing night celebration will be at Austin City Limits Live (ACL Live), just a short walk from the JW Marriott. Food will be provided by Terry Black’s BBQ and live music will be with nine-time Grammy Award Winning Ray Benson and Asleep at the Wheel. Remember to leave your tie at home for this memorable evening with your friends and family.

The educational and social program for this 2018 POSNA Annual Meeting is outstanding. The POSNA volunteers, staff and I are most excited to welcome you to Austin.

Richard M. Schwend, MD
POSNA President
RICHARD M. SCHWEND, MD
POSNA PRESIDENT

Richard M. Schwend MD, is Chief of Orthopaedic Research at the Children’s Mercy Hospital, and is Professor of Orthopaedics and Pediatrics, University of Missouri, Kansas City and University of Kansas Medical Center. He graduated with BA Biochemistry from the University of California, MD from St. Louis University Medical School, orthopaedic residency at Harvard Combined Orthopaedic Residency and fellowship at Children’s Hospital, Boston. He recently completed the Global Clinical Research Training Program, Harvard University. He is the immediate past chair of the Orthopaedic Section of the American Academy of Pediatrics and is board certified in pediatrics, in addition to Orthopaedics. He was the 2001 Scoliosis Research Society Travelling Fellow and Harvard University, Cave Travelling Fellowship to Bern, Switzerland. He has received the POSNA Humanitarian and the POSNA Special Effort awards. He is Medical Director of the Project Perfect World Ecuador Program, which since 2002 has been developing a pediatric orthopaedic and spine program. His research interests involve program development in regions with limited resources, pediatric spine and chest anatomy and surgical safety. He is a retired Colonel, United States Air Force. Dr. Schwend and his wife Colleen have two children and one granddaughter. In his spare time he enjoys bicycling to work, swimming, fly fishing, reading history, reading about airplanes and travel.

STEVEN L. FRICK, MD
POSNA INCOMING PRESIDENT

Dr. Steven L. Frick is a pediatric orthopaedic surgeon who joined the faculty of the Stanford University Department of Orthopaedic Surgery in December 2016. He was the founding Chairman of the Department of Orthopaedic Surgery at Nemours Children's Hospital in Orlando, FL from 2012-2016. He also served as Surgeon-in-Chief and Chairman of the Department of Surgery. A native of Greenville, South Carolina, he graduated from The George Washington University and received his medical education at the Medical University of South Carolina. He completed orthopaedic surgery residency and a basic science research fellowship at Carolinas Medical Center in Charlotte NC, and a fellowship in pediatric orthopaedic surgery at Children's Hospital San Diego. He served from 1998-2012 on the faculty and as Residency Program Director in the Department of Orthopaedic Surgery at Carolinas Medical Center. His academic interests include clubfoot and foot/ankle disorders, trauma, hip dysplasia, growth, leadership, professionalism, and graduate medical education. He has been honored with induction into the Eastside High School and The George Washington University Athletic Halls of Fame. He was selected by the American Orthopaedic Association as a North American Traveling Fellow (2001) and an American-British-Canadian Traveling Fellow (2007), and as a Leadership Fellow (2002-3) for the American Academy of Orthopaedic Surgeons. He is active in organized medicine, previously chairing the Leadership Development Committees of both the American Orthopaedic Association and the American Academy of Orthopaedic Surgeons. He was the annual meeting program chair for the Pediatric Orthopaedic Society of North America (2010), and for the American Academy of Orthopaedic Surgeons (2013). He serves on the Question Writing Task Force for the American Board of Orthopaedic Surgery. He has also served on the Executive Committee of the J. Robert Gladden Orthopaedic Society (dedicated to promoting multi-culturalism and diversity in orthopaedics), and edits and reviews manuscripts for multiple orthopaedic journals. He was Treasurer of POSNA. He lives in Redwood City, CA with his wife of 31 years, Lisa. Their son Eric is a graduate of the University of South Carolina and the George Mason University School of Law and practices in Charlotte, NC, and daughter Rachel is a graduate of North Carolina State University and is currently enrolled in the Temple University Occupational Therapy program in Philadelphia, PA.

*Provided financial support to POSNA for the 2018 POSNA Annual Meeting
Dear friends and fellow pediatric orthopedic surgeons,

We are looking forward to having you visit Austin, Texas for the Annual POSNA meeting from May 9-12, 2018. This year's scientific program under the direction of our president, Rick Schwend and program chair, Jeffrey Sawyer promises to be nothing less than outstanding.

Austin is located “deep in the heart of Texas”. It is the state capital, and has been the home of 2 United States presidents in the past half century. It is a bustling center of government when the state legislature is in session (every other year for 6 months), and home of one of the top 10 state universities in the US. (Texas Longhorns). But more than being just a center of government and education, it is the soul of Texas culture both old and new, with a vibrant community of scholars, musicians, artists, ranchers, and developers of new age technology.

Diverse cultures of the South and Southwest US come together in Austin to create an amazingly rich music and food scene. We are the “live music capital of the world”, and on any given night there are numerous venues for listening to music ranging from “blues” to “country swing’ to “salsa and merengue”. Over the past few years chefs have been flocking to Austin to create dining experiences fusing influences of Latin America, Texas barbecue, and locally sourced farm to table produce.

Austin is somewhat of an oasis with rivers, lakes, and hills in an otherwise flat, dry state. Our downtown is very walkable, with a hike and bike trail winding its way around our appropriately named, “Town Lake”. Our weather in May can be unpredictable. It’s possible to have cool nights and clear warm days, or tropical weather with high temperatures and sudden dramatic thunderstorms. Either way, we have plenty of sunshine, and expect our guests to get outside and exercise around the lake.

We welcome our POSNA friends to come to Austin and enjoy our slower pace and outdoor lifestyle, while visiting with colleagues, and exchanging new ideas and collaboration. Who knows you may return home with a cowboy hat or new pair of boots!

Jay Shapiro, Local Host
John Williams, Local Host
GENERAL MEETING INFORMATION

LEARNING OBJECTIVES

Objective 1: Learn about the latest advances in pediatric orthopaedic surgery.
Objective 2: Obtain opinions of world-renowned thought leaders in the field.
Objective 3: Use the information obtained to make improvements in their own practices.
Objective 4: Fulfill the annual meeting requirements for membership in POSNA.

ACCREDITATION

This Annual Meeting of the Pediatric Orthopaedic Society of North America has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Academy of Orthopaedic Surgeons and POSNA.

The American Academy of Orthopaedic Surgeons is accredited by the ACCME to provide continuing medical education for physicians.

CONTINUING MEDICAL EDUCATION

The American Academy of Orthopaedic Surgeons designates this live activity for a maximum of 22.75 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Scientific Program 15.75
Subspecialty Day 3.75

Senior Members: .............. $ 375
Children 13-17, per child: .... $ 100
Children 6-12, per child: .... $ 10

PRE-COURSE REGISTRATION

Member: ......................... $ 150
Non-member: ................... $ 200
RN/PA/Allied Health: .......... $ 100
Resident/Fellow**: ............. $ 100

FRIDAY SUBSPECIALTY DAY REGISTRATION*

Friday ONLY – Member: ........ $ 250
Friday ONLY – Non-member: ... $ 300
Friday ONLY – Allied Health: ... $ 200
Friday ONLY – Resident/Fellow: $ 200

8.9 hours may be used for external trauma-related CMEs. Presentations denoted with are eligible for these credits.

*Friday Subspecialty Day registration is Friday only, and includes breakfast, the morning scientific paper sessions, afternoon sessions, and the Closing Reception in the evening.

**Residents/Fellows must have the phone number and signature of their Chief of Service on their registration form to qualify for the reduced fee. Without a signature and phone number, you will be charged the non-member fee.
GENERAL MEETING INFORMATION

BADGES
Badges are required for entry to the Exhibit Hall, POSNA sessions and events, and are distributed with a paid registration. [White] Annual Meeting Registration [Blue] Pre-Course Registration [Green] Friday Only [Lavender] Accompanying Person

EVENT CANCELLATION
Due to circumstances beyond our control, the Pediatric Orthopaedic Society of North America may elect to cancel the Annual Meeting. These circumstances may include but are not limited to disaster, severe weather, civil commotion or government laws or regulations. In the event of such cancellation, all Annual Meeting registrants will be notified by email at the address noted in the POSNA database; and registration fees will be refunded in full. Other costs incurred by the registrant, such as airline or hotel penalties, are the responsibility of the registrant.

DISCLOSURE
Each faculty member in this meeting has been asked to disclose if he or she has received something of value from a commercial company or institution, which relates directly or indirectly to the subject of their presentation.

An indication of the participant’s disclosure appears after his or her name as well as the commercial company or institution that provided the support. POSNA does not view the existence of these disclosed interests or commitments as necessarily implying bias or decreasing the value of the author’s participation in the meeting.

FDA STATEMENT
Some drugs or medical devices demonstrated at this meeting may not have been cleared by the FDA or have been cleared by the FDA for specific purposes only. The FDA has stated that it is the responsibility of the physician to determine the FDA clearance status of each drug or medical device he or she wishes to use in clinical practice.

Academy policy provides that ‘off label’ uses of a drug or medical device may be described in the Academy’s CME activities so long as the “off label” use of the drug or medical device is also specifically disclosed (i.e., it must be disclosed that the FDA has not cleared the drug or device for the described purpose). Any drug or medical device is being used “off label” if the described use is not set forth on the product’s approval label.

♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (i.e. the drug or medical device is being discussed for an “off label” use).

SPEAKER READY ROOM INFORMATION
POSNA REQUIRES ALL ELECTRONIC PRESENTATIONS TO BE MADE USING THE CENTRAL COMPUTER SYSTEM. No Laptop computers will be allowed.

Note: All presentations (including concurrent sessions) MUST be uploaded in the Speaker Ready Room located in the General Session room, JW Grand Ballroom 5-8.

FULL PROGRAM CAN BE FOUND IN THE 2018 MEETING APP
Access the meeting app by downloading My POSNA from the Apple App or Google Play store.

Schedules will NOT be provided at registration. We encourage you to create your schedule in the app by bookmarking sessions, where you can download into your Outlook calendar.
DISCLAIMER
The material presented at the Annual Meeting has been made available by the Pediatric Orthopaedic Society of North America for educational purposes only. The material is not intended to represent the only, nor necessarily best, method or procedure appropriate for the medical situations discussed, but rather is intended to present an approach, view, statement or opinion of the faculty which may be helpful to others who face similar situations.

POSNA disclaims any and all liability for injury or other damages resulting to any individual attending the Annual Meeting and for all claims which may arise out of the use of the techniques demonstrated therein by such individuals, whether these claims shall be asserted by physician or any other person.

INSURANCE/LIABILITIES
POSNA will not be held liable for personal injuries or for loss or damage to property incurred by participants or guests at the Pre-Course or Meeting, including those participating in tours and social events. Participants and guests are encouraged to take out insurance to cover losses incurred in the event of cancellation, medical expenses or damage to or loss of personal effects when traveling outside their own country.

POSNA cannot be held liable for any hindrance or disruption of the Meeting arising from natural, political, social or economic events or other unforeseen incidents beyond its control. Registration of a participant implies acceptance of this condition.

PRIVACY POLICY – USE OF PERSONAL INFORMATION
Annual Meeting registration lists, including the registrant’s name and postal mailing address are provided to POSNA’s sponsors as a sponsor benefit.

REPRODUCTION POLICY
POSNA reserves any and all rights to materials presented at the Annual Meeting, including Posters and ePosters. Reproductions of any kind, by any person or entity, without prior written permission from POSNA, are strictly prohibited. Prohibited reproductions include, but are not limited to, audiotapes, videotape, and/or still photography. Cameras or video cameras may not be used in any portion of the scientific sessions. Persons violating this policy may have their badge confiscated and be escorted from the meeting. No unapproved surveys, handouts, or literature may be distributed at the meeting.

PHOTOGRAPHY
Registration and attendance at, or participation in, POSNA activities constitutes an agreement by the registrant to allow POSNA to capture, retain, and utilize (both now and in the future) the attendees’ image, likeness, voice, and actions, whether captured live or recorded and in any format, during the Annual Meeting, for display, exhibition, publication, or reproduction in any medium or context for any purpose, including but not limited to, POSNA member communications, commercial or promotional purposes.

NO SMOKING POLICY
Smoking is not permitted during any meeting or event.

1. A complete assessment of the quality of individual studies requires critical appraisal of all aspects of the study design.
2. A combination of results from two or more prior studies.
3. Studies provided consistent results.
4. Study was started before the first patient enrolled.
5. Patients treated one way (e.g., with cemented hip arthroplasty) compared with patients treated another way (e.g., with cementless hip arthroplasty) at the same institution.
6. Study was started after the first patient enrolled.
7. Patients identified for the study on the basis of their outcome (e.g., failed total hip arthroplasty), called "cases," are compared with those who did not have the outcome (e.g., had a successful total hip arthroplasty), called "controls."
8. Patients treated one way with no comparison group of patients treated another way.

**ANNUAL BUSINESS MEETINGS**

All POSNA members are urged to attend the Annual Business Meetings held in Grand Ballroom 5-8 of the J.W. Marriott. The meetings will be held Thursday, May 10th from 12:15 PM–1:15 PM and Friday, May 11th from 12:00 PM–1:00 PM. Lunch will be provided.

**2018 NOMINATING COMMITTEE**

In May 2017, the membership elected five members by ballot to serve on the 2018 Nominating Committee. President, Richard M. Schwend, MD appointed the Chair of Nominating Committee. The members of the 2018 Nominating Committee are: James McCarthy, MD, Chair Peter O. Newton, MD Jack M. Flynn, MD Ellen M. Raney, MD Gregory A. Mencio, MD James O. Sanders, MD (alternate)

The 2018 Nominating Committee will present its slate of nominees for each vacancy during the first business meeting, Thursday, May 10th.

**2019 NOMINATING COMMITTEE**

Nominations for the 2019 Nominating Committee will be accepted from the floor during the second business meeting on Friday. New this year, all members will receive an electronic ballot after the 2018 Annual Meeting, with an opportunity to cast their votes for nominees to fill the elected positions on the 2019 Nominating Committee.

**BYLAWS COMMITTEE**

Proposed amendments to the POSNA Bylaws were circulated to the membership in March 2018. The Bylaws Committee will present the proposed amendments to the membership during the first business meeting on Thursday, March 11th.
Traditional Elasticity, New Strength

Patient Benefits

☑ Stability of the osteosynthesis in all planes due to the superior medullary canal filling compared to standard cylindrical nails.

☑ Developed to limit X-ray exposure during insertion due to the unique shape that allows visual control of nail orientation.

☑ Minimal invasiveness of the device.

Natural History in Pediatric Orthopaedics: How Good is the Data on Which We Base our Decisions?

Chair: Wudbhav N. Sankar, MD

DESCRIPTION
Proper knowledge of the natural history of pediatric orthopaedic conditions is essential to providing high quality care. Without an understanding of how patients’ conditions would evolve untreated, one is unable to accurately evaluate the relative benefits of a given form of treatment. In spite of this, the natural history of many pediatric orthopaedic conditions is poorly understood.

The purpose of this pre-course is to draw attention to the data that is known and the data that is unknown about several common pediatric orthopaedic conditions. This will inform our membership and provide a springboard for discussion about future directions in research and registry development.

LEARNING OBJECTIVES
Upon completion of this program, participants should be able to:

Objective 1: To appreciate what is known and unknown about the natural history of several common pediatric orthopaedic conditions including issues related to lower extremity alignment, hip pathology, spinal deformity, and traumatic sports injuries.

Objective 2: To appreciate how the natural history of a given condition directly impacts a decision on whether or not to recommend surgery.

Objective 3: To understand how future research could be designed to improve our understanding of the natural history of pediatric orthopaedic conditions.

ACCREDITATION
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Academy of Orthopaedic Surgeons and the Pediatric Orthopaedic Society of North America. The American Academy of Orthopaedic Surgeons is accredited by the ACCME to provide continuing medical education for physicians.

CONTINUING MEDICAL EDUCATION
The American Academy of Orthopaedic Surgeons designates this live activity for a maximum of 3.75 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. .45 hours may be used for external trauma-related CMEs.
PRE-COURSE

Natural History in Pediatric Orthopaedics: How Good is the Data on Which We Base our Decisions?

J.W. Marriott, Austin, Texas

WEDNESDAY, MAY 9

8:00 AM–8:02 AM  OPENING WELCOME
POSNA President: Richard Schwend, MD
Pre-Course Chair: Wudbhav N. Sankar, MD

8:02 AM–8:14 AM  KEYNOTE SPEAKER
Importance of Natural History
Stuart Weinstein, MD

SESSION 1
Natural History of LE Deformity
Presider: Mark Seeley, MD
Moderator: James Kasser, MD

8:15 AM–8:23 AM  Mild Leg Length Discrepancy
Eric Gordon, MD

8:24 AM–8:32 AM  Angular Deformities of the Lower Extremity
Philip McClure, MD

8:33 AM–8:41 AM  Rotational Malalignment of the Lower Extremity
Ira Zaltz, MD

8:42 AM–8:50 AM  Debate: Miserable Malalignment Surgery Pro vs. Con
Peter Stevens, MD vs. Michelle Caird, MD

8:50 AM–8:58 AM  Questions

Natural History of Hip Conditions
Presider: Mark Seeley, MD
Moderator: Dennis Wenger, MD

8:59 AM–9:07 AM  Acetabular Dysplasia
Daniel Cooperman, MD

9:08 AM–9:16 AM  ♦ SCFE Deformity
A. Noelle Larson, MD

9:17 AM–9:25 AM  Femoroacetabular Impingement
Young-Jo Kim, MD, PhD

9:26 AM–9:34 AM  Spastic Hip
Benjamin Shore, MD, MPH, FRCSC

Ernest Sink, MD vs. Kishore Mulpuri, MD

9:43 AM–9:51 AM  Questions
♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (i.e. the drug or medical device is being discussed for an “off label” use).

9:52 AM–10:12 AM  Break

Mr. Evan Smith, Chief Executive Officer-Texas Tribune
“The Future is Texas (unless we screw it up).”

8:00 PM–9:30 PM  WELCOME RECEPTION
JAMES W. ROACH, MD
DISTINGUISHED ACHIEVEMENT AWARD

James W. Roach MD retired in 2016 as a Professor of Orthopaedic Surgery at the University of Pittsburgh where he held the William F. and Jean W. Donaldson Endowed Chair in Pediatric Orthopaedics.

Dr. Roach, a Texan, graduated from Texas Tech University with a degree in Chemistry, attended law school at the University of Texas, graduated from Georgetown University School of Medicine and attained an MBA at Duke University. His intern-ship and residency were at Tripler Army Medical Center, Honolulu, Hawaii and his fellowship at Texas Scottish Rite Hospital.

Dr. Roach held several academic and business positions during his career. Prior to joining the University of Pittsburgh, he had been the Assistant Chief of Staff at the Texas Scottish Rite Hospital for 13 years, the Director of Pediatric Orthopaedic Surgery and Vice- Chairman of the Cook-Fort Worth Children’s Health Care System for 9 years, Chief of Staff of Shriner’s Hospitals for Children Salt Lake City for 10 years and the Medical Director of Shriner’s Hospitals for Children Erie for 6 years. He had special interests in the treatment of complex spinal deformities, developmental dysplasia of the hip, outcomes research, and pediatric trauma. He published 96 articles, book chapters, and textbooks and has presented his research findings at 199 national and international meetings. He was a member of the American Academy of Orthopaedic Surgery, the Pediatric Orthopaedic Society of North America, and the Scoliosis Research Society. He served as an Associate Editor of Spine Deformity and as a reviewer for the Journal of Pediatric Orthopaedics, Spine, and the Journal of AAOS. He was the Director of the University of Pittsburgh Pediatric Orthopaedic Fellowship Program and in 2010-2011, President of the Pediatric Orthopaedic Society of North America.

MICHAEL MILLIS, MD
2018 PRESIDENTIAL GUEST SPEAKER

Dr. Millis is a graduate of Harvard Medical School and the Harvard Combined Orthopaedic Residency Program. He was Chief Resident under Dr John Hall at the Boston Children’s Hospital. After 2 years in the US Navy in Charleston, he returned to a faculty position with Dr. Hall in Boston. Following a fellowship with Professor Heinz Wagner, in Germany, he has pursued a career-long interest in developmental hip conditions and their evolution through adolescence and adulthood, with a particular interest in hip preservation surgery. He was the Founding Director of the Adolescent and Young Adult Hip Unit at Boston Children’s Hospital and is Professor of Orthopaedic Surgery at Harvard Medical School. He began the continuing series of Instructional Courses on Hip Osteotomies and Hip Preservation at the AAOS Annual Meetings in 1984. He, Dr John Clohisy, and Dr Perry Schoenecker founded the ANCHOR Group. He and Dr Young-Jo Kim established the Children’s Hospital Hip Fellowship in 2003. He is a member of POSNA, EPOS, the American Hip Society and the International Hip Society. Dr. Millis received the Pro Maximis Meritis Award from EPOS in 2017.
DEREK M. KELLY, MD
SPECIAL EFFORTS AND EXCELLENCE AWARD

Derek M. Kelly, MD is a Professor of Orthopaedic Surgery for the University of Tennessee-Campbell Clinic Department of Orthopaedic Surgery. He serves as the Campbell Clinic Pediatric Orthopedic Fellowship Director, and the Campbell Clinic Assistant Orthopaedic Residency Program Director. After graduation from medical school and orthopaedic surgery residency at the University of Arkansas for Medical Sciences in Little Rock, AR, he completed the Dorothy and Bryant Edwards Fellowship in Pediatric Orthopaedic and Spine Surgery at Texas Scottish Rite Hospital for Children in Dallas, TX. He currently practices pediatric orthopaedics and spinal deformity surgery at Campbell Clinic and Le Bonheur Children’s Hospital in Memphis, TN. He is active in a number of professional societies, including the American Academy of Orthopaedic Surgeons (AAOS), American Orthopaedic Association (AOA), Scoliosis Research Society (SRS), and the Pediatric Orthopedic Society of North America (POSNA) where he has served on multiple committees and currently chairs the POSNA Publications Committee. He also serves as the Deputy Editor for Review Articles for the Journal of Pediatric Orthopaedics. He is an active member of the International Perthes Study Group (IPSG) where he serves as Chair of the Membership Committee. He was a POSNA/EPOS Traveling Fellow in 2016. He has contributed over 65 peer-reviewed scientific articles to the orthopaedic literature, as well as numerous chapters to orthopaedic textbooks. He has been married to Hallie for 13 years and has two daughters, Muriel (6) and Anabel (4).

LYNN T. STAHELI, MD
HUMANITARIAN AWARD

Dr. Lynn Staheli is a Professor Emeritus from the University of Washington. He graduated from the University of Utah Medical School with AOA Honor Society membership (1959), and served three years as medical doctor in the United States Air Force (1960-1963). He completed his residency in orthopaedics at the University of Washington (1969), and was one of five to receive the AOA Outstanding Resident Award. During his thirty-year practice at Seattle Children’s Hospital, Dr. Staheli served Director of Research and Education (1970-1977) and Department Director (1977–1992). The Staheli Chair for Research in Pediatric Orthopaedics was established at Seattle Children’s Hospital in Seattle (2002). He also started three annual lectures that still continue to this day.

Dr. Staheli received a Carl Berg Traveling Scholarship (1971). Before POSNA was established, he served as President of Pediatric Orthopedic Study Group (1979). He is the Founding Editor (1981-2002) and Editor Emeritus (2002-present) of the Journal of Pediatric Orthopedics, and Founder of the International Scholarship of Pediatric Orthopaedics (1982). His research, talks, and publications are credited with changing the management of developmental variations in children and dispelling the myth of the “corrective shoe.” For this contribution, he received the first Distinguished Service Award from the American Academy of Pediatrics (1995). Later he received the Distinguished Achievement Award from POSNA (2002), a Merit of Honor Award from the University of Utah (2004), the AACPDM Humanitarian Award (2010), and was the Presidential Guest Speaker at POSNA (2004). Over his career, Dr. Staheli has taught in 40 countries and has published 85 papers, 10 chapters, and 18 books.

Dr. Staheli founded Global HELP Organization (2002) and served as Volunteer Director (2002–present). Global HELP provides free medical publications and videos worldwide (180 publications and 175 videos in total). PDFs are available in up to 35 languages and have been downloaded from Global HELP’s website over 22 million times in over 190 countries. Global HELP has since added two sub-sites, Pediatric Orthopaedic Academy (POA) in English and Spanish, and provides free and open access to all materials. The organization created and published Clubfoot: Ponseti Management (2.5 million PDF downloads, 30,000 printed copies, available in 31 languages) and has contributed to sustainable clubfoot projects in Uganda and Bangladesh.
Evan Smith is the CEO and co-founder of The Texas Tribune, a pioneering nonprofit, nonpartisan digital news organization whose deep coverage of Texas politics and public policy can be found at its website, texastribune.org, in newspapers and on TV and radio stations across the state, and in the print and online editions of the Washington Post. Since its launch in 2009, the Tribune has won international acclaim and numerous honors, including a Peabody Award, thirteen national Edward R. Murrow Awards from the Radio Television Digital News Association and three general excellence awards from the Online News Association. Evan is also the host of “Overheard with Evan Smith,” a weekly half-hour interview program that airs on PBS stations around the country. Previously he spent nearly 18 years at Texas Monthly, including eight years as the magazine’s editor and a year as its president and editor in chief.

Pediatric Orthopaedic Surgery Career Opportunity

The Department of Pediatric Orthopaedic Surgery at Joe DiMaggio Children’s Hospital is seeking an eighth full-time BE/BC fellowship-trained Pediatric Orthopaedist to join our extremely collegial, rapidly expanding practice. Subspecialty interest in upper extremity, sports, oncology or non-operative is a strong plus, but not required. This is an excellent opportunity to join a regional referral, tertiary care practice at a large freestanding and full-service children’s hospital. This is an academic-style practice with strong subspecialty programs in spinal deformity, sports medicine, limb deformity, tumors and hip surgery. Our extensive referral base includes four counties in South Florida (population nearly six million) and the Caribbean. An active transport team provides rotary, fixed-wing and ground transport (regional and international).

This is a full-time employed position with the multi-specialty Memorial Physician Group. The position offers competitive benefits and a compensation package that is commensurate with training and experience. Professional malpractice and medical liability is covered under sovereign immunity.

About Joe DiMaggio Children’s Hospital

Joe DiMaggio Children’s Hospital opened in 1992 and has grown to be the leading children’s hospital in Broward and Palm Beach counties. With 226 beds, an 84-bed Level II and II NICU, 30-bed PICU and 12-bed intermediate care unit, Joe DiMaggio Children’s Hospital combines leading-edge clinical excellence with a child- and family-friendly environment that emphasizes the Power of Play. In addition, our team specializes in treating young athletes through our [U18] Sports Medicine program.

Located in the heart of South Florida, a region whose quality of life attracts new residents from all over the country and around the world, Joe DiMaggio Children’s Hospital offers a comprehensive range of healthcare services – delivered with kindness, dedication and compassion. In addition, Florida has no state income tax.

For more information about the division, please visit www.kidbones.net. Interested candidates should submit their CV to Michael Jofe, MD at mjofe@mhs.net.

kidbones.net memorialphysician.com
Our Department of Pediatric Orthopedics may be known for its multidisciplinary expertise, but we really specialize in one thing – kids. Akron Children’s is committed to advancing pediatric orthopedic care through dedicated clinics and many research projects currently in progress. It’s just one of the many ways we’re 100% focused on kids and their unique needs.

For more information, referring physicians can call 330-543-3500.

POPS Symposium
1:30 PM – 3:30 PM

Co-Chairs: Christi Abeln, APN, B.C.P.N.P
Colleen Ditro, DNP, RN, CPNP

The Safety, Health and Wellness of the Orthopaedic Pediatric Patient
This 90-minute symposium will involve discussions on the safety, health and wellness of the pediatric patient during their orthopaedic care. Dr. Reid Nichols will discuss the preparation of the orthopaedic patient for surgery from a health and wellness perspective. The symposium will end with a discussion from Dr. Jessica Peck on how the Advanced Practice Provider can identify possible risk factors for child trafficking and initiate prompt intervention in the orthopaedic clinic.

Moderator(s): Christi Abeln, APN, B.C.P.N.P

Telemedicine

Telemedicine is rapidly becoming a prominent offering for many medical practices. At a time when medical costs are rising and the demand for immediate access to medical professionals is increasingly expected by the public, telemedicine has been touted as a possible lower cost solution to providing specific types of care directly to patients at their convenience. This symposium will start by addressing the definition of telemedicine and then explore how it is utilized by some of the members of POSNA. We will explore areas such as the variations in state regulation, concerns over billing, the ethical issues that can occur, and how telemedicine might be best structured into a pediatric orthopaedic practice.

RESEARCH Symposium:
Evidence Based Practice Workshop
1:30 PM – 3:30 PM

Co-Chairs: Theodore Ganley, MD; Corinna Franklin, MD; Matthew Milewski, MD; Paul Sponseller, MD

The Evidence-Based Practice and the Research Committees of POSNA have worked collaboratively to present our membership with a combined program. Our society’s thought leaders will address ways to improve your practice both now and in the future by addressing state of the art evidence-based medicine principles and techniques. Colleagues will also show how they have applied those principles by briefly presenting their award-winning research initiatives that have been funded by POSNA-supported grants.

PERIOD 1
Evidence Based Practice Design and Debate

Moderator(s): Paul Sponseller, MD
Scott McKay, MD

1:30 PM–1:37 PM The Mission - What is the Roadmap of Guidelines, Appropriate Use Criteria, and Performance Measures and How Does that Lead to Value? Kevin Shea, MD

1:38 PM–1:45 PM A Debate - Is Evidence Based Medicine the “Enemy of Personalized Medicine” or the “Path to Quality, Value and Safety”? John (Jack) Flynn, MD

1:46 PM–1:53 PM Study Design – Formulating a Translational Research Question Jonathan Schoenecker, MD, PhD

1:55 PM–2:02 PM Data Collection - Can Electronic Capture Systems - Help or Hurt Us in Collecting Data, Incentivizing Patients and Improving Follow up? Keith Baldwin, MD, MSPT, MPH

Opioid Epidemic in 2018: Strategies for Pediatric Orthopaedic Patients Symposium
1:30 PM – 3:30 PM

Co-Chairs:  Harold van Bosse, MD; Kerwyn Jones, MD

Prescription Opioids and Children: The Best Use to Prevent Misuse, While Bringing Pain to Truce

This symposium was developed in response to the growing concern of opioid misuse, particularly as related to children and teenagers, and how to safeguard our patients as best possible, while appropriately managing their post-operative or injury related pain. The goals of the session will be to understand the extent of the opioid epidemic in children, including nationwide demographics on the non-medical use of prescription opioids by children, the physiologic factors that place children at risk for opioid abuse, and prescribing practices that may contribute to the problem. Physiology of pain and how it can be altered, practice strategies and alternatives to opioid pain medications will be discussed, as well as possible future directions for POSNA-led studies in this field.

Moderator(s):  Harold van Bosse, MD
               Kerwyn Jones, MD

1:30 PM–1:35 PM  Welcome/Introduction

2:45 PM–3:00 PM  Recommendations for Outpatient Opioid Prescriptions for
                 Children/Teens
                 Susan T. Mahan, MD, MPH

3:00 PM–3:15 PM  Alternative Strategies
                 Peri-operative
                 Robert H. Cho, MD
                 Anthony Cooper, MD, FRCS

                 ♦ Non-Opioid Outpatient Medications
                 Ellen Raney, MD

                 ♦ Cognitive and Emotional Strategies
                 Ellen Raney, MD

3:15 PM–3:30 PM  Question and Answer Panel

♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (ie. the drug or medical device is being discussed for an "off label" use).
Children’s Orthopaedics in Under-Resourced Environments (COUR) Symposium
1:30 PM – 3:30 PM
Chair: Coleen Sabatini, MD, MPH

We Must Not Forget - Caring for Those with Polio and the Emerging Polio-Like Syndromes

The world is not yet polio free, and may never be. Places long-thought to be free of polio have recently been the site of new polio-like syndromes…this includes the USA. As the generation of surgeons that learned to care for polio has aged beyond their teaching roles, younger surgeons are at risk of repeating the mistakes of the past while caring for those with these polio-like syndromes, especially since the care of polio is no longer taught in our training programs.

This symposium brings together world experts in polio care who will cover the current state of polio and the polio-like syndromes, including epidemiology, surgical management, non-operative management and the future of orthopedic care for those with polio and polio-like syndromes.

Moderator(s): Norgrove Penny, MD, FRCS(C)

Planning Your Financial Future: You Are Not as Rich as You Think
Mark A. Erickson, MD

5:27 PM–5:37 PM
Q&A

SESSION 2
Priorities in Practice

5:38 PM–6:03 PM
Balancing Your Clinical and Academic Lives: What Are the Priorities?
Round Table Discussion
Moderator: Martin Herman, MD
Panelists: Craig P. Eberson, MD, Thomas G. McPartland, MD,
Mark A. Erickson, MD, Robert H. Cho, MD

SESSION 3
Looking into the Future

6:04 PM–6:09 PM
Pediatric Orthopedic Workforce: 2030 and Beyond
Jeffrey Sawyer, MD

6:10 PM–6:20 PM
Changing the Face of Pediatric Orthopedics:
The Importance of Promoting Diversity
Corinna C. Franklin, MD

6:21 PM–6:30 PM
Q&A
**FRIDAY, MAY 11, 2018**

### welcome and remarks

7:30 AM–7:34 AM  
**Welcome and Remarks**

### clinical award session

**Moderator:** Steven Frick, MD  
**eModerator:** Matthew Dobbs, MD  
**Presider:** Matthew Oetgen, MD

♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (ie. the drug or medical device is being discussed for an “off label” use).
Friday, May 11, 2018, continued

10:39 AM–10:59 AM  **PRESIDENTIAL GUEST SPEAKER**  
*Michael Millis, MD*

11:00 AM–11:05 AM  **2019 Meeting Highlights**

11:06 AM–11:25 AM  **Presidential Transfer**
The 2018 POSNA hip subspecialty program will be divided into 3 periods. The first period will include 10 podium presentations on a variety of hip related topics. The second period will cover case discussions for two controversial topics. First, we will discuss three treatment options for moderate to severe stable slipped capital femoral epiphysis (SCFE), followed by three treatment options to address healed residual femoral head deformity in patients with Perthes disease. Finally, there will be 7 Master’s techniques presentations on less commonly performed hip procedures such as the Colonna procedure, femoral neck osteotomy for healed SCFE and clinical application of biologics for Perthes disease.

PERIOD 1
Free Papers

Paper 83 1:30 PM–1:34 PM
Closed vs. Open Reduction in Developmental Dysplasia of the Hip: The Effect on Acetabular Remodeling
Oussama Abousamra, MD; David Deliberato, DO; Satbir Singh, BS; Kevin Klingele, MD
Nationwide Children’s Hospital, Columbus, OH

Paper 84 1:35 PM–1:39 PM
Inter- and Intraobserver Reliability of the Radiographic Diagnosis of Avascular Necrosis of the Femoral Head in Developmental Dysplasia of the Hip
Emily Schaeffer, PhD; Wudbhav N. Sankar, MD; Harry Kim, MD; Simon Kelley, MBChB; Peter Cundy; Charles Price, MD; Nicholas Clarke, FRCS; John Wedge, MD; R-IHDI Study Group; Kishore Mulpuri, MBBS
BC Children’s Hospital, Vancouver, British Columbia, Canada

Paper 85 1:40 PM–1:44 PM
Femoral Nerve Palsy in Brace Treatment for Developmental Dysplasia of the Hip: Incidence and Outcomes in a Prospective International Cohort
Emily Schaeffer, PhD; Judy Wu, BS; Nicholas Clarke, FRCS; Simon Kelley, MBChB; Nicole Williams; R-IHDI Study Group; Kishore Mulpuri, MBBS
BC Children’s Hospital, Vancouver, British Columbia, Canada

1:45 PM–1:54 PM Discussion
Paper 86  1:55 PM–1:59 PM  
Avascular Necrosis Following Operative Treatment of Unstable Slipped Capital Femoral Epiphysis: Fifteen Year Experience with Positional or Open Reduction  
Craig Louer, MD; Zachary Meyer, MD; Samantha Katz; Gregory Landers, BS; Mark Miller, MD; J. Gordon, MD; Perry Schoenecker, MD; Jeffrey Nepple, MD  
Washington University School of Medicine, St. Louis, MO

Paper 87  2:00 PM–2:04 PM  
Patients with Sequelae of Slipped Capital Femoral Epiphysis have a Specific Pattern of Cartilage Wear at the Acetabulum and Femoral Head  
Perajit Eamsobhana, MD; John Clohisy, MD; Jeffrey Nepple, MD; Karla Crook, BS; James Egan, BA; Cecilia Pascual-Garrido, MD  
Washington University in St. Louis, St. Louis, MO

Paper 88  2:05 PM–2:09 PM  
Effect of Skeletal Maturity on Proximal Femoral Deformity After Prophylactic Screw Fixation of the Uninvolved Hip Contralateral to a Unilateral Slipped Capital Femoral Epiphysis  
Aaron Boyles, DO; Vedant Kulkarni, MD; Jacob Carl, MD; Benjamin Wilson, MD; Ryan Muchow, MD; Jennette Boakes, MD; Anita Bagley, PhD  
Shriners Hospitals for Children - Northern California, Sacramento, CA

2:10 PM–2:19 PM  Discussion

Paper 89  2:20 PM–2:24 PM  
Modified Waldenstrom Classification Less than II-B Associated with Better Surgical Results in Severe Legg-Calve-Perthes Disease  
Charles Mehlman, DO; Ayesha Yahya, DO; Junichi Tamai, MD; Emily Eismann, MS; Alvin Crawford, MD  
Cincinnati Children’s Hospital Medical Center, Cincinnati, OH

Paper 90  2:25 PM–2:29 PM  
Is Visual Inspection of Perfusion MRI as Reliable as MRI Analysis Software in Estimating Perfusion of the Femoral Head in Children with Legg-Calvé-Perthes Disease?  
Harry Kim, MD; A. Noelle Larson, MD; Simon Thomas; David Neal, MD; Benjamin Shore, MD, MPH, FRCSC; Judson Karlen, MD; Pablo Castaneda, MD; David Wilkes, MD; Molly Dempsey, MD; Pamela Nurenberg, MD; Yassine Kanaan, MD; Tianyi Luo, MD; Jamie Burgess, PhD; Chan-Hee Jo, PhD; For the International Perthes Study Group  
Texas Scottish Rite Hospital for Children, Dallas, TX

Paper 91  2:30 PM–2:34 PM  
Do Focal Chondral Defects Lead to Worse Outcomes after Periacetabular Osteotomy?  
Michael Hellman, MD; Jeffrey Nepple, MD; Cecilia Pascual-Garrido, MD; ANCHOR Study Group; John Clohisy, MD  
Washington University in St. Louis, St. Louis, MO

Paper 92  2:35 PM–2:39 PM  
Pre-operative Mental Health Status is a Significant Predictor of Post-operative Outcomes in Adolescents Treated with Hip Preservation Surgery  
David Podeszwa, MD; Heather Richard; Shelby Parker, MA; Adriana De La Rocha, PhD  
Texas Scottish Rite Hospital for Children, Dallas, TX
2:50 PM–3:10 PM Break

PERIOD 2
Case Discussion

3:10 PM–3:45 PM Moderate to Severe Stable SCFE
SCFE Panel

In Situ Screw Fixation +/- Osteochondroplasty
Jeffrey Nepple, MD

In Situ Fixation with Combined Osteochondroplasty and Imhauser Osteotomy
Kevin E. Klingele, MD

Modified Dunn Procedure
Eduardo V. Novais, MD

3:45 PM–4:20 PM Healed Residual Deformity with Pain
Perthes Panel

Surgical Dislocation with Osteochondroplasty
Wudbhav N. Sankar, MD

Relative Neck Lengthening
Young-Jo Kim, MD, PhD

Femoral Head Reduction
Daniel J. Sucato, MD, MS

4:20 PM–4:30 PM Break

PERIOD 3
Master’s Techniques

4:30 PM–4:40 PM Shelf Procedure for Perthes
William Mackenzie, MD

4:40 PM–4:50 PM Pelvic Osteotomies for Bladder Exstrophy
Paul Sponseller, MD

4:50 PM–5:00 PM Colonna (Capsular Arthroplasty) Procedure
Travis Matheney, MD

5:00 PM–5:10 PM Periacetabular Osteotomy
Ira Zaltz, MD

5:10 PM–5:20 PM Dega Procedure with Closed Tri-radiate
Vineeta Swaroop, MD

5:20 PM–5:30 PM Femoral Neck Osteotomy for Healed SCFE
Prasad Gourineni, MD

5:30 PM–5:40 PM Clinical Application of Biological Treatments for Perthes Disease
Harry Kim, MD

♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (ie. the drug or medical device is being discussed for an “off label” use).
TRAUMA SUBSPECIALTY DAY
1:30 PM – 5:40 PM

Upper Extremity Challenges and Adolescent Trauma
Chairs: Brian Scannell, MD and Andrew Howard, MD

The 2018 POSNA Trauma Subspecialty day will cover two main topics in addition to the free paper session. The first session will be on “Upper Extremity Challenges” including the management of supracondylar malunions, late presentations of elbow fractures, and stiff elbows after trauma. The second session will discuss controversial topics involving trauma in the adolescent patient. This will include adolescent supracondylar humeral fractures, managing growth arrests, and treatment of adolescent tibia fractures. Both sessions will have case presentations and a panel discussion.

PERIOD 1
Free Papers

Paper 93 1:30 PM–1:34 PM
Flexible Intramedullary Nailing of Femoral Shaft Fractures: Closed Versus Open Reduction
James Beaty, MD; Derek Kelly, MD; Spencer Richardson; James Dove; Benjamin Sheffer, MD; David Spence, MD; Jeffrey Sawyer, MD; William Warner, MD
Campbell Clinic Orthopedics, Germantown, TN

Paper 94 1:35 PM–1:39 PM
Risk Factors for Adverse Radiographic Outcomes after Elastic Intramedullary Nailing of Tibial Shaft Fractures in Children
Andrew Pennock, MD; Jason Pedowitz, BS; Dell McLaughlin, MD; Tracey Bastrom, MA; Nirav Pandya, MD; Vidyadhar Upasani, MD
Rady Children's Hospital, San Diego, CA

Paper 95 1:40 PM–1:44 PM
Rate of Concurrent, Ipsilateral Tibia Shaft and Distal Tibia Fractures in Pediatric Patients
Derek Kelly, MD; Benjamin Sheffer, MD; Mims Ochsner, MD; Eric Villarreal, BA; Jeffrey Sawyer, MD; William Warner, MD; James Beaty, MD; David Spence, MD
Campbell Clinic Orthopedics, Memphis, TN

1:45 PM–1:54 PM Discussion

Paper 96 1:55 PM–1:59 PM
Similar Outcomes following both Operative and Non-Operative Treatment of Medial Epicondyle Fractures in Athletes
Derek Axibal, MD; Patrick Carry, MS; Anne Skelton, BS; Stephanie Mayer, MD
Children's Hospital Colorado, Aurora, CO

Paper 97 2:00 PM–2:04 PM
The Utility of Intra-Operative Arthrogram in the Management of Pediatric Lateral Condyle Fractures of the Humerus
John Vorhies, MD; Shawn Funk, MD; Marilyn Elliott; Anthony Riccio, MD; Brandon Ramo, MD
Texas Scottish Rite Hospital for Children, Dallas, TX

Complications after Titanium Elastic Nailing of the Forearm
Matthew Abbott, MD; G. Li, MD; Michelle Caird, MD; Frances Farley, MD
University of Michigan, Ann Arbor, MI

Clinical and Radiographic Comparison of Sugar Tong Splint to Long Arm Cast Immobilization for Unstable Pediatric Forearm Fractures
Robert Murphy, MD; Leah Plumblee, MD; Brian Sleasman, MD; William Barfield, PhD; James Mooney, MD
Medical University of South Carolina, Charleston, SC

Long-term Outcomes Following Distal Clavicle Fractures in Adolescents: Does Internal Fixation Improve Outcomes?
Ishaan Swarup, MD; Steven Orr, MD; Kunal Agarwal, MS; Peter Fabricant, MD; Roger Widmann, MD; David Scher, MD; Emily Dodwell, MD, MPH, FRCSC
Hospital for Special Surgery, New York, NY

Are Patients Equally Satisfied with Advanced Practice Providers Compared to Surgeons in a Pediatric Fracture Clinic?
Christine Ho, MD
Children's Medical Center, Dallas, TX
Friday, May 11, 2018, continued

3:50 PM–4:20 PM  
**Case Presentation and Panel Discussion**  
Andrew Howard, MD

4:20 PM–4:30 PM  Break

PERIOD 3  
**Trauma in the Adolescent**

4:30 PM–4:40 PM  
**Adolescent Supracondylar Humerus Fractures**  
Brian Scannell, MD

4:40 PM–4:50 PM  
**Managing Growth Arrests – A Frame Surgeon’s Perspective**  
Simon P. Kelley, FRCS

4:50 PM–5:05 PM  
**The Adolescent Tibia – Nails, Frames, or Casts?**  
Brian Brighton, MD and Christopher Iobst, MD

5:05 PM–5:20 PM  
**Case Presentations and Panel Discussion**  
Christopher D. Souder, MD

LOWER EXTREMITY/NEUROMUSCULAR SUBSPECIALTY DAY  
1:30 PM – 5:40 PM

Chairs:  
M. Wade Shrader, MD and  
Emily Dodwell, MD, MPH, FRCSC

The lower extremity/neuromuscular subspecialty program covers a range of clinically relevant and in some cases controversial topics. Our afternoon starts with the neuromuscular section; a debate on hip resection versus total hip arthroplasty for painful degenerative hips in cerebral palsy. We will then explore models for transitioning care for young adults with cerebral palsy, and how to perform gait analysis without a gait lab, followed by a Master Technique session on the management of pelvic obliquity. The lower extremity section starts with another debate; lengthening vs shortening for a 5cm leg length discrepancy. We will review the most meaningful pediatric lower extremity literature published this past year, and review the newest biologic treatments for pediatric orthopedic conditions. This will be followed by a Master Technique session on the management of congenital vertical talus.

PERIOD 1  
**Neuromuscular**

1:30 PM  
**Welcome**  
M. Wade Shrader, MD

1:30 PM–1:45 PM  
**Salvage Debate in GMFCS IV/V Hips: Hip Resection vs. Arthroplasty**  
M. Wade Shrader, MD vs. David M. Scher, MD

1:45 PM–2:00 PM  
**Audience Discussion**

2:00 PM–2:10 PM  
**Models for Transition**  
David P. Roye, MD

2:10 PM–2:20 PM  
**Master Technique: Management of Pelvic Obliquity**  
Kirk W. Dabney, MD, MHDS
Friday, May 11, 2018

2:20 PM–2:30 PM  
**Gait Analysis without a Lab**  
Vedant A. Kulkarni, MD

2:30 PM–2:40 PM  
**Q&A**

2:40 PM–3:00 PM

UPPER EXTREMITY SUBSPECIALTY DAY
1:30 PM – 5:40 PM

Chairs: Christine Ho, MD and Apurva Shah, MBA, MD

Learn from the Masters! Surgical techniques for treatment of neonatal brachial plexus palsy injury and congenital hand deformity will be discussed by world-class experts, with special attention to “How I Do It.” Case presentations will enhance discussion of nerve and muscle transfers, open shoulder reduction, osteotomies, cleft hand, radial dysplasia, and macrodactyly.

PERIOD 1
Masters Techniques in Brachial Plexus Birth Injury
Moderator: Roger Cornwall, MD

1:30 PM–1:40 PM     Technique Presentation 1: Spinal Accessory Nerve Transfer (Including Technical Pearls for Posterior Approach)
                      Peter M. Waters, MD

1:40 PM–1:50 PM     ♦ Technique Presentation 2: Uncommon Nerve Transfers
                      Scott Kozin, MD

1:50 PM–1:55 PM     Q&A

1:55 PM–2:05 PM     Technique Presentation 3: Open Reduction and Tendon Transfers of the Dislocated Shoulder
                      Christopher Stutz, MD

2:05 PM–2:15 PM     Technique Presentation 4: Glenoid Anteversion Osteotomy
                      Sevan Hopyan, MD

2:15 PM–2:20 PM     Q&A

4:10 PM–4:20 PM  Discussion

PERIOD 3
Master Techniques in Congenital Hand Deformity
Moderator: Joshua M. Abzug, MD

Radial Dysplasia
4:30 PM–4:40 PM  Technique Presentation 1: Vikki Transfer
Scott Oishi, MD, FACS
4:40 PM–4:50 PM  Technique Presentation 2: Lengthening/Centralization
Charles A. Goldfarb, MD

Cleft Hand
4:50 PM–5:00 PM  Technique Presentation 3: Miura
Terry Light, MD
5:00 PM–5:10 PM  Technique Presentation 4: Snow Littler
Michelle A. James, MD

Macroductyly
5:10 PM–5:20 PM  Technique Presentation 5: Debulking / Ray Resection
Scott Oishi, MD, FACS
5:20 PM–5:40 PM  Q&A and Case Presentations
**SPINE SUBSPECIALTY DAY**
1:30 PM – 5:40 PM

**Chairs:** Matthew Oetgen, MD and Lindsay Andras, MD

The POSNA 2018 spine specialty program is designed to update surgeons on current cutting-edge topics and provide tips and tricks on a range of issues related to adolescent idiopathic scoliosis. The first session is entitled Cutting Edge Debates and will feature pro and con debates on subjects including the efficacy of Schroth physical therapy, optimal use of braces, the role of surgical techniques and technology such as anterior spinal tethering, Ponte osteotomies, and magnetic controlled growing rods. The second session entitled “Top 3 in 5” is a new format which will feature three tips for treating a variety of common issues encountered in in AIS. Topics addressed will include choosing implant positions, leveling the shoulders, optimizing OR teams, managing neuromonitoring changes, treating the draining spine, and more.

**PERIOD 1**
**Cutting Edge Debates**

**Moderator:** Lindsay Andras, MD

Paper 124  4:25 PM–4:29 PM
A Novel 3D Parameter Can Guide Concave Rod Contour for the Correction of Lost Kyphosis in Adolescent Idiopathic Scoliosis
Peter Newton, MD; Dylan Kluck, MD; Thomas Sullivan, MD; Megan Jeffords, MS; Tracey Bastrom, MA; Fredrick Reighard, MPH; Burt Yaszay, MD
Rady Children’s Hospital, San Diego, CA

Paper 125  4:30 PM–4:34 PM
Dedicated Spine Nurses and Scrub Technicians Improve Outcomes and Efficiency of Surgery for Adolescent Idiopathic Scoliosis
Rajan Murgai, BS; Ena Nielsen, BA; Lindsay Andras, MD; Hazel Gould; David Skaggs, MD
Children’s Hospital Los Angeles, Los Angeles, CA

4:35 PM–4:44 PM  Discussion

Paper 126  4:45 PM–4:49 PM
Minimally Invasive Versus Standard Surgery in Idiopathic Scoliosis Patients: A Comparative Study
Vishal Sarwahi, MBBS; Romain Dayer, MD; Charlotte Launay, MD; Stephen Wendolowski, BS; Jesse Galina, BS; Yungtai Lo, PhD; Terry Amaral, MD
Cohen Children’s Medical Center, New Hyde Park, NY

Paper 127  4:50 AM–4:54 PM
The Lumbosacral Takeoff Angle (LSTOA) Can Be Used to Predict Residual Lumbar Cobb in Selective Thoracic Fusions
Keith Bachmann, MD; Edwin Lu, BS; Wendy Novicoff, PhD; Peter Newton, MD; Mark Abel, MD
University of Virginia, Charlottesville, VA

Paper 128  4:55 PM–4:59 PM
Clinical Outcomes of Surgically Treated High-grade Spondylolisthesis and their Relation to Spinal Deformity Study Group (SDSG) Classification
Daniel Bouton, MD; Daniel J. Sucato, MD, MS
Texas Scottish Rite Hospital for Children, Dallas, TX

5:00 PM–5:09 PM  Discussion

Paper 129  5:10 PM–5:14 PM
Positive Predictors of Success in EDF Casting - The Role of Traction
Shyam Kishan, MD; Cody Shafer, MD; Kimberly Sundblad; Randall Loder, MD
Riley Hospital for Children, Indiana University, Indianapolis, IN

Paper 130  5:15 PM–5:19 PM
Comparison of Deformity Correction and Complications with Growth-friendly and Early Primary Posterior Spinal Fusion in 8-11 Year Old Children with Dcoliosis
Jaime Gomez, MD; Regina Hanstein, PhD; Jacob Schulz, MD; Tricia St. Hilaire, MPH; Klane K. White, MD; Ron El-Hawary, MD; Sumeet Garg, MD; Patrick Cahill, MD; Michael Vitale, MD, MPH; Gregory Redding, MD
Children’s Hospital at Montefiore, Bronx, NY
SPORTS SUBSPECIALTY DAY
1:30 PM – 5:40 PM

Chairs: Benton E. Heyworth, MD and Jennifer M. Weiss, MD

The 2018 POSNA sports medicine subspecialty program will cover three main topics: (1) pediatric ACL injuries, (2) controversial fractures in young athletes, and (3) QSVI in pediatric sports medicine. The first session will be divided up into two aspects central to the topic of pediatric and adolescent ACL injury management. Firstly, six different new techniques in the treatment of ACL injuries will be reviewed, followed by pitfalls and complications specific to treatment of ACL injury in this younger population of athletes. The second session will explore the literature, indications, and techniques for the treatment of fractures common to pediatric athletes, but which have controversial and/or variable treatment approaches. The third session will briefly review the history and future of QSVI initiatives, as they relate to pediatric sports medicine as a subspecialty, and within the larger spheres of pediatric orthopaedics, sports medicine, and general orthopaedics.

PERIOD 1A
New Techniques in Pediatric ACL Management

1:30 PM–1:36 PM  Suture-Based ACL Repair
Jay Albright, MD

1:38 PM–1:44 PM  ♦ Bridge-Enhanced ACL Repair
Yi-Meng Yen, MD

1:46 PM–1:52 PM  Quad Tendon ACL Reconstruction
James Lee Pace, MD

1:54 PM–2:00 PM  ALL Reconstruction + ACL Reconstruction
Theodore Ganley, MD

2:02 PM–2:08 PM  Iliotibial Band ACL Reconstruction
Melissa Ann Christino, MD

2:10 PM–2:16 PM  All-Epiphysial Reconstruction
J. Todd Lawrence, MD, PhD

2:16 PM–2:22 PM  Q&A – Entire ACL Panel

♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (ie. the drug or medical device is being discussed for an “off label” use).
Friday, May 11, 2018, continued

PERIOD 1B
Pitfalls & Complications in Pediatric ACL Management

2:24 PM–2:30 PM  Growth Disturbance after ACL Reconstruction
Peter D. Fabricant, MD

2:30 PM–2:40 PM  Arthrofibrosis after ACL Reconstruction
Mininder Kocher, MD, MPH

2:40 PM–3:00 PM  Break

PERIOD 2A
‘Controversial’ Fractures in Adolescent Athletes

3:00 PM–3:08 PM  Medial Epicondyle
Eric W. Edmonds, MD

3:10 PM–3:18 PM  Ischial Tuberosity
Andrew T. Pennock, MD

3:20 PM–3:28 PM  Midshaft Clavicle
Nirav Kiritkumar Pandya, MD

3:30 PM–3:38 PM  Jones Fx /5th MT
Henry B. Ellis, MD

3:40 PM–3:48 PM  Type 2 Tibial Spine
Stephanie W. Mayer, MD

3:50 PM–3:58 PM  Lateral Malleolus/SER 2
Dennis E. Kramer, MD

PERIOD 2B

4:00 PM–4:10 PM  QSVI in Sports Medicine: Where Are We Heading and How Can We Do It Right?
Kevin Shea, MD

4:10 PM–4:20 PM  Break

PERIOD 3
Free Papers

Paper 133  4:20 PM–4:24 PM  Outcomes of Medial Patellar Tendon Transfer with Proximal Realignment in Young Skeletally Immature Children with Patellar Instability
Jeffrey Nepple, MD; Samantha Katz; Lauren Davis, MPH; Perry Schoenecker, MD; Scott Luhmann, MD
Washington University School of Medicine, St. Louis, MO

Paper 134  4:25 PM–4:29 PM  The Role of Hemiepiphysiodesis and Guided Growth in the Treatment of Lateral Patellar Instability in Pediatric and Adolescent Patients
Ryan Fallon; Eric Davis, BS; Mininder Kocher, MD, MPH; Benton Heyworth, MD
Boston Children’s Hospital, Boston, MA
Paper 135  4:30 PM–4:34 PM
The Role of Abnormal Tibiofemoral Rotation in Pediatric and Adolescent Patellar Instability
David Bernholt, MD; Joseph Lamplot, MD; Eric Eutsler, MD; Jeffrey Nepple, MD
Washington University School of Medicine, St. Louis, MO

4:35 PM–4:44 PM  Discussion

Paper 136  4:45 PM–4:49 PM
A Retrospective Review of the Evaluation and Management of Discoid Meniscus in the Pediatric Population
Catherine Logan; Frances Tepolt, MD; Mininder Kocher, MD, MPH
Boston Children’s Hospital, Boston, MA

Paper 137  4:50 PM–4:54 PM
The Sensitivity and Specificity of Pre-Operative History, Physical Examination, and Magnetic Resonance Imaging to Predict Articular Cartilage Injuries in Symptomatic Discoid Lateral Meniscus
Nirav Pandya, MD; Brian Lau, MD
UCSF Benioff Children’s Hospital, Oakland, CA

Paper 138  4:55 PM–4:59 PM
Neeraj Patel, MD; David Mai, MD; Austin Ramme, MD; Mara Karamitopoulos, MD; Pablo Castaneda, MD; Alice Chu, MD
NYU Langone Medical Center, New York, NY

5:00 PM–5:09 PM  Discussion

Paper 139  5:10 PM–5:14 PM
♦ Outcomes of ACL Reconstruction (Ipsilateral and Contralateral Failure) Using Biologic Augmentation in the Adolescent Patient
Paul Fleissner, MD
Crystal Clinic Orthopaedic Center, Akron, OH

Paper 140  5:15 PM–5:19 PM
Comparison of Bone-Tendon-Bone Versus Hamstring Autografts for Anterior Cruciate Ligament (ACL) Reconstruction in the Adolescent Population
Nirav Pandya, MD
UCSF Benioff Children’s Hospital Oakland, Oakland, CA

Paper 141  5:20 PM–5:24 PM
All-Epiphyseal Anterior Cruciate Ligament Reconstruction does not Increase the Risk of Complications Compared to Pediatric Transphyseal Reconstruction
Neeraj Patel, MD; Christopher Defrancesco, BS; Nakul Talathi, BS; Joshua Bram, BS; Theodore Ganley, MD
The Children’s Hospital of Philadelphia, Philadelphia, PA

♦ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (ie. the drug or medical device is being discussed for an “off label” use).
Paper 142  
5:25 PM–5:29 PM  
Dynamic Functional Deficits Continue 9 Months After Adolescent Anterior Cruciate Ligament Reconstruction  
Jennifer Beck, MD; Kelly E. Cline, MD; Jay I. Semel, DPT; Rebecka Serpa; Kendall Anne Shifflett, BS; Edward Ebramzadeh, PhD; Richard E. Bowen, MD  
Orthopedic Institute for Children, Los Angeles, CA

5:30 PM–5:40 PM  
Discussion

POSNA CLOSING NIGHT  
AT AUSTIN CITY LIMITS LIVE

Location: 310 Willie Nelson Blvd., Austin  
Date: May 11, 2018  
Time: 7:30 PM – 11:00 PM

7:30 pm Doors open  
8:00 – 9:30 pm Dinner  
8:45 – 9:15 pm Country and Western line dancing instruction  
9:30 – 10:30 pm Asleep at the Wheel  
10:30 – 11:00 pm Country and Western line dancing

The Friday closing event will be at ACL Live at the Moody Theater which is only four blocks from the JW Marriott.

Austin City Limits Live at The Moody Theater (ACL Live) is a state-of-the-art, 2,750-person capacity live music venue that hosts approximately 100 concerts a year. It serves as the permanent home for the taping of the acclaimed KLRU-TV produced PBS series, Austin City Limits, the longest running music series in American television history.

Dinner will be provided by Terry Black’s BBQ, recognized by Texas Monthly as one of the state’s top 50 BBQ restaurants.

Nine-time Grammy winner Ray Benson and Asleep at the Wheel will be your entertainment for the evening.

Attire: Texas Semiformal – coat, no tie, jeans, and boots.  
Women’s: Texas Semiformal – Cocktail Dress, boots optional

Get ready to eat and two step the night away.

*Included with attendee registration. Accompanying Persons must be registered to attend. Ticket includes dinner, entertainment, and two drink tickets.

*A ticket will be provided with your registration badge for this event. Your ticket is required for entry to ACL and will be exchanged at the event for your two drink tickets.
SATURDAY, MAY 12, 2018

8:00 AM–8:05 AM  Welcome and Remarks
QSVI Award Paper Presented by: Peter Armstrong, MD
Trauma Paper Award / Best Paper Awards

FOOT/ANKLE

Moderator: Derek Kelly, MD
eModerator: Natasha O’Malley, MD
Presider: Jennifer Laine, MD

Paper 143  8:06 AM–8:10 AM
Duration of Brace Wear in Clubfoot Treatment—A Prospective Randomized Trial, Multicenter Trial
Matthew Dobbs, MD; Steven Frick, MD; Vincent Mosca, MD; Ellen Raney, MD; Joel Lerman, MD; Vishwas Talwalkar, MD; Christina Gurnett
Washington University School of Medicine, St. Louis, MO

Paper 144  8:11 AM–8:15 AM
Ponseti Clubfoot Bracing: 8 Hours Each Night Will Result in Success
B. Stephens Richards III, MD; Shawne Faulks, RN; Kevin Felton
Texas Scottish Rite Hospital for Children, Dallas, TX

Paper 145  8:16 AM–8:20 AM
Patient Reported Outcomes of the Ponseti Method for Untreated Idiopathic Clubfeet in Nepalese Patients Treated Between 1 to 5 Years of Age at a Minimum of 10 Years Follow-up
Bibek Banskota, MBBS; Prakash Yadav, MPH; Tarun Rajbhanderi, MS; Om Shrestha; Divya Talwar, MPH; Ashok Banskota; David Spiegel, MD
The Children’s Hospital of Philadelphia, Philadelphia, PA

Paper 146  8:21 AM–8:30 AM  Discussion

Paper 147  8:30 AM–8:34 AM
Plantar Pressures in Patients with Symptomatic Flexible Flatfoot: How are They Different than Adolescents with Asymptomatic Flatfoot?
Kirsten Tulchin-Francis, PhD; Anthony Riccio, MD; Ashley Erdman, BS
Texas Scottish Rite Hospital for Children, Dallas, TX

Paper 148  8:35 AM–8:39 AM
Growth Modulation of Juvenile Hallux Valgus in Skeletally Immature Children
Ming Hung Chiang, MD; Kuan-Wen Wu, MD; Ting-Ming Wang, MD; Ken Kuo, MD
National Taiwan University Hospital, Taipei, Taiwan

Paper 148  8:40 AM–8:44 AM
Posterior Ankle Impingement – The Most Under-diagnosed, Treatable Cause of Posterior Ankle Pain in Pediatric and Adolescent Patients?
Indranil Kushare, MD; Sachin Allahabadi, MD; Lee Haruno, BS; Ifeoma Inneh
Texas Children’s Hospital, Houston, TX

8:45 AM–8:53 AM  Discussion
HIP

Moderator: Ernest Sink, MD
eModerator: Eduardo Novais, MD

Washington University School of Medicine, St. Louis, MO

Poster 3
Validation Study of the Thumb Ossification Composite Index (TOCI) in Idiopathic Scoliosis – A Stage to Stage Correlation with Classic Tanner Whitehouse and Sander’s Simplified Skeletal Maturity System (SSMS)
Alec Hung, MD; Simon Chow, PhD; Wai Wang Chau, MSc; Tsz Ping Lam, MBBS; Bobby Ng, MD; Jack Cheng, MD
Chinese University of Hong Kong, Shatin, Hong Kong

Poster 4
Economic Burden of Pediatric Musculoskeletal Infection
Jonathan Schoenecker, MD; Ryan Koehler, MD; Keith Baldwin, MD, MSPT, MPH; Joshua Murphy, MD; Lawson Copley, MD; Vidyadhar Upasani, MD
Vanderbilt, Nashville, TN

Poster 5
Gram Stain is Not Clinically Relevant in Management of Pediatric Septic Arthritis
Joshua Bram, BS; Keith Baldwin, MD, MSPT, MPH; Todd Blumberg, MD
Children’s Hospital of Philadelphia, Philadelphia, PA

Poster 6
Autologous Chondrocyte Implantation as Treatment for Unsalvageable Osteochondritis Dissecans: 10- to 25- year Follow Up
Kevin Shea, MD; James Carey, MD; Haris Vasiliadis, MD; Carl Lindahl; Lars Peterson, MD; Anders Lindahl, MD
St. Luke’s Hospital, Boise, ID

◆ Indicates those faculty presentations in which the FDA has not cleared the drug and/or medical device for the use described (i.e. the drug or medical device is being discussed for an “off label” use).
Poster 7
Major Complications following Surgical Correction of Spine Deformity in 253 Patients with Cerebral Palsy
Burt Yaszay, MD; Carrie Bartley, MA; Paul Sponseller, MD; Patrick Cahill, MD; Suken Shah, MD; Firoz Miyanji, MD, FRCSC; Amer Samdani, MD; Mark Abel, MD; Peter Newton, MD
Rady Children’s Hospital, San Diego, CA

Poster 8
Comparison of the Results of Primary versus Repeat Hamstrings Surgical Lengthening in Cerebral Palsy
Mauro de Morais Filho, MD; Francesco Blumetti, MD; Catia Kawamura, PT; Marcelo Matias, MD; Marcelo Fujino; Jose Augusto Lopes, MSc; Daniella Neves
AACD, São Paulo, SP, Brazil

Poster 9
Addition of Dexmedetomidine and Aprepitant to a Multimodal Postoperative Pain Regimen Reduces Narcotic Requirements, Emesis and Length of Stay in Treating Adolescent Idiopathic Scoliosis
Andrew Tice, MD; Heather Kent; Dong-Phuong Tran, MS; Chan-Hee Jo, PhD; Brandon Ramo, MD
Texas Scottish Rite Hospital, Dallas, TX

Poster 10
Are We Getting Value for Our Research Money? Impact of POSNA Grants on Scholarly Productivity and Future Funding Success
Derek Nhan, BS; Jonathan Schoenecker, MD; Paul Sponseller, MD
Johns Hopkins Bloomberg Children’s Center, Baltimore, MD

Poster 11
The Effectiveness of Intrathecal Morphine Compared to Oral Methadone for Postoperative Pain Control after Posterior Spinal Fusion for Adolescent Idiopathic Scoliosis
Benjamin Martin, MD; Matthew Oetgen, MD; Shannon Kelly, MD; Jeffrey Hanway, MD; Sophie Pestieau, MD; Jessica Cronin, MBA; Karen Thomson
Children’s National Health System, Washington, DC

Poster 12
Challenge Accepted – Results of the 2016 POSNA Quality, Safety, and Value Initiative (QSVI) Challenge
Lindsay Stephenson, MD; Daniel Miller, MD; Patrick Cahill, MD; Joseph Janicki, MD; Paul Choi, MD
POSNA, Rosemont, IL

Poster 13
Women in Leadership: How Does POSNA Rate?
Jennifer Weiss, MD; Lisa Cannada, MD; Sharul Saxena
Kaiser Permanente, Los Angeles, CA

Poster 14
Publication Outcomes of POSNA Abstracts: A Comparison of Awarded and Non-awarded Submissions
Kushal Khera; Emily Schaeffer, PhD; Neha Kodali; Kishore Mulpuri, MBBS
BC Children’s Hospital, Vancouver, British Columbia, Canada
Poster 15
Patient Reported SRS-24 Outcomes Scores after Surgery for Adolescent Idiopathic Scoliosis Have Improved
Tracey Bastrom, MA; Peter Newton, MD; Harms Study Group
Rady Children’s Hospital, San Diego, CA

Poster 16
Building the Case for Optimal Prophylaxis for Growth-Friendly Surgery for Non-idiopathic Scoliosis: Using Vancomycin and Aminoglycosides
Anas Minkara, BS; Hiroko Matsumoto, MA; Michael Glotzbecker, MD; Jack Flynn, MD; John Smith, MD; Amer Samdani, MD; Lisa Saiman, MPH; Michael Vitale, MD; Michael Vitale, MD
Children’s Spine Study Group
Columbia University Medical Center, New York, NY

Poster 17
Changes in Pediatric Spine Surgery Patterns Over the Last 10 Years Among ABOS Part II Candidates
Ena Nielsen, BA; Lindsay Andras, MD; Pooya Hosseinzadeh, MD; Megan Mignemi, MD; Jack Flynn, MD; Stephen Albanese, MD; David Skaggs, MD
Children’s Hospital Los Angeles, Los Angeles, CA

Poster 18
Weight Gain Following ACL Reconstruction in Pediatric and Adolescent Patients
Elle Macalpine; Divya Talwar, MPH; Eileen Storey BA; John Todd Lawrence, MD
The Children’s Hospital of Philadelphia, Philadelphia, PA

Poster 19
Unplanned Return to the Operating Room for Pediatric Diaphyseal Femoral Fractures
Jigar Gandhi; Mahmoud Abo Elmagd; Alexandre Arkader, MD; Jack Flynn, MD
The Children’s Hospital of Philadelphia, Philadelphia, PA
ePoster 1
*Scoliosis within the 22q11.2 Deletion Syndrome*
Jelle Homans, MD; Vyaas Baldew, BS; Tom Schlosser, MD; Moyo Kruyt, MD; Rene Castelein, MD
University Medical Center Utrecht, Utrecht, The Netherlands

ePoster 2
*Effectiveness of the Ponseti Method in Treating Foot Deformities in Children with Arthrogryposis*
Reid Nichols, MD; Chris Church, PT; Zafir Ahmed; Nancy Lennon, PT; John Henley, PhD; Daveda Taylor, DPT; Maureen Donohoe, DPT; Kathryn Fazio, PA-C; Freeman Miller, MD
Nemours duPont Hospital for Children, Wilmington, DE

ePoster 3
*Comparison of the Acetabular Osteotomies for Developmental Dysplasia of the Hip Using Patient Specific 3-D Printed Pelvic Models*
Jason Caffrey; Megan Jeffords, MS; Christine Farnsworth, MS; Vidyadhar Upasani, MD
Rady Children’s Hospital-San Diego, San Diego, CA

ePoster 4
*Open Reduction and Internal Fixation for Osteochondritis Dissecans of the Femoral Head in Patients with Legg-Calve-Perthes Disease*
Perry Schoenecker, MD; Joseph Lamplot, MD; Cecilia Pascual-Garrido, MD; Jeffrey Nepple, MD; John Clohisy, MD
Washington University in Saint Louis School of Medicine, St. Louis, MO

ePoster 5
*Radiation Exposure in the Young Adult Hip Patient: Does Low-dose Computed Tomography Reduce Radiation Exposure Adequately?*
Alvin Su, MD; Travis Hillen, MD; Eric Eutsler, MD; Asheesh Bedi, MD; James Ross, MD; Christopher Larson, MD; John Clohisy, MD; Jeffrey Nepple, MD
Washington University School of Medicine, St. Louis, MO

ePoster 6
*Characterization of the Optimal Reduction Maneuver During Simulated Periacetabular Osteotomy*
Jeffrey Nepple, MD; James Ross, MD; Asheesh Bedi, MD; Sean Akers; John Clohisy, MD
Washington University School of Medicine, St. Louis, MO

ePoster 7
*Pediatric Lyme Arthritis of the Hip: A Systematic Review and Meta-Analysis*
Aristides Cruz, MD; Jason Anari, MD; Jose Ramirez, MD; Wudbhav Sankar, MD; Keith Baldwin, MD, MSPT, MPH
The Children’s Hospital of Philadelphia, Philadelphia, PA
ePoster 8
Pigmented Villonodular Synovitis in Children and Adolescents
Samuel Willimon, MD; Michael Busch, MD; Tim Schrader, MD; Crystal Perkins, MD
Children’s Healthcare of Atlanta, Atlanta, GA

ePoster 9
Epidemiology and Surgical Trends of Pediatric Patellar Dislocations:
A 16-year Review of Cases in New York State
Alice Chu, MD; Shalen Kouk, MD; John Begly, MD; David Mai, MD; June Chanyasulkit, MD
NYU Langone Orthopedic Hospital, New York, NY

ePoster 10
3D Knee Trochlear Morphology by Magnetic Resonance Imaging: Normal versus Patella
Instability in Pediatric Patients
Andrew Pennock, MD; Aileen Chang, MD; Josh Doan, MS; James Bomar, MPH; Eric Edmonds, MD
Rady Children’s Hospital, San Diego, San Diego, CA

ePoster 11
Outcomes Following Hemiepiphysiohesis in Patients with Idiopathic Genu Valgum Using Physeal
Staples Versus Tension Band Plating: A Systematic Review
Derrick Knapik, MD; James Buschbach, BA; Sanjeev Sabharwal, MD; Raymond Liu, MD
Rainbow Babies and Children’s Hospital, Cleveland, OH

ePoster 12
Perceptions and Attitudes Towards Children with Orthopaedic Devices
Angela Eugenio; Harpreet Chhina, MSc; Anthony Cooper, MD, FRCS
BC Children’s Hospital, Vancouver, British Columbia, Canada

ePoster 13
Most Patients are Not Back to Normal Activities One Month Following Eight Plates
Hulaimatu Jalloh, BA; David Skaggs, MD; Peter Stevens, MD; Stephanie Holmes, MD;
Victoria Heagy, BS; Lindsay Andras, MD
Children’s Hospital Los Angeles, Los Angeles, CA

ePoster 14
Risk Factors Associated with Patellar Cartilage Damage in Children and Adolescents with
Patellar Instability
Rebecca Greenstein; Hee K. Kim; Paul Horn; Neil Rajdev, BA; Shital Parikh, MD
Cincinnati Children’s Hospital Medical Center, Cincinnati, OH

ePoster 15
The Use of Medical Scribes in Ambulatory Pediatric Orthopaedic Surgery Practice
Melissa Bent, MD; Jen Birstler, BS; Steven Wheeler, BS; Ken J. Noonan, MD
University of Wisconsin Madison, Madison, WI

ePoster 16
Minimal Clinically Important Difference (MCID) for CPCHILD Questionnaire following
Scoliosis Surgery in Cerebral Palsy (CP)
Firoz Miyanji, MD, FRCSC; Luigi Nasto, MD; Paul Sponseller, MD; Tracey Bastrom, MA;
Suken Shah, MD; Amer Samdani, MD; Michelle Marks, PT; Burt Yaszay, MD; Unni Narayanan, MBBS;
Peter Newton, MD
BC Children’s Hospital, Vancouver, British Columbia, Canada
ePoster 17
Do all Patients with Cerebral Palsy Require Postoperative Intensive Care Admission After Posterior Spinal Fusion?
Jaysson Brooks, MD; Burt Yaszay, MD; Tracey Bastrom, MA; Carrie Bartley, MA; Paul Sponseller, MD; Suken Shah, MD; Amer Samdani, MD; Patrick Cahill, MD; Firoz Miyanji, MD, FRCSC; Peter Newton, MD; Harms Study Group
Rady Children’s Hospital, San Diego, CA

ePoster 18
Differences in Caregiver Perspective on Quality of Life of Children with Cerebral Palsy
Emily Schaeffer, PhD; Maria Juricic, PT; Stacey Miller, PT; Judy Wu, BS; Kishore Mulpuri, MBBS
BC Children’s Hospital, Vancouver, British Columbia, Canada

ePoster 19
Rectus Femoris Transfer versus Resection in Patients with Cerebral Palsy with Stiff Knee Gait
Julianne Sees, DO; Kathleen Maguire, MD; Freeman Miller, MD; Kenneth Rogers, PhD; Chris Church, PT; Geovanny Oleas-Santillán; John Henley, PhD; Nancy Lennon, PT
AI duPont Hospital for Children, Wilmington, DE

ePoster 20
Comparison of Pediatric PROMIS CATs between Parent-Proxy and Patient Report Populations with Upper Extremity Fractures
Charles Goldfarb, MD; Ryan Calfee, MD; Ugochi Okoroafor, MD; William Gerull, BS; Jason Guattery, MS
Washington University School of Medicine, St. Louis, MO

ePoster 21
Financial Analysis of Closed Femur Fractures in 3 to 6 Year-olds Treated with Immediate Spica Casting versus Intramedullary Fixation
Robert Lewis, MD; Omar Hariri; Marilyn Elliott, BS; Chan-Hee Jo, PhD; Anthony Riccio, MD; Brandon Ramo, MD
Children’s Medical Center of Dallas, Dallas, TX

ePoster 22
Delayed, Outpatient Surgical Management of Pediatric Supracondylar Humerus Fractures: Efficacy, Safety and Cost Analysis
Ryan Neeley, DO; Satbir Singh, BS; Allan Beebe, MD; Christopher Iobst, MD; Kevin Klingele, MD
Nationwide Children’s Hospital, Columbus, OH

ePoster 23
Improving Access to Pediatric Orthopedic Expertise Using an Asynchronous eConsult System
Kevin Smit, MD; Youjin Chang, MD; Ken Kontio, FRCSC; Sasha Carsen, MD
Children’s Hospital of Eastern Ontario, Ottawa, Canada

ePoster 24
Efficiency and Safety: When is the Best Time to Valve a Plaster Cast?
Sam Steiner, MD; Kirollos Gendi, MD; Matthew Halanski, MD; Ken Noonan, MD
University of Wisconsin, UWSMPH Madison, WI
ePoster 25
Utilization of Electronic Medical Records (EMR) Registries to Improve ACL Outcomes, Patient Compliance, and Lower Complications: A Quality Improvement Project
Kristina Parvanta; Jacob Parker, BS; Andrew Pennock, MD
Rady Children's Hospital, San Diego, CA

ePoster 26
High Mismatch Between Sanders and Risser Staging in Adolescent Idiopathic Scoliosis: Are We Guiding Treatment Using the Wrong Classification?
Benjamin Roye, MD; Anas Minkara, BS; Hiroko Matsumoto, MA; Nicole Bainton, NP; Masashi Tanaka, MD; Fay Callejo, MPH; Justin Kung; Christopher Deallie, BS; David Roye, MD; Michael Vitale MD
Columbia University Medical Center, New York, NY

ePoster 27
How Much will my Child’s Operation Cost? Availability of Consumer Prices from US Hospitals for a Common Pediatric Orthopaedic Surgical Procedure
Allison Racimo, MS; Nakul Talathi, BS; Nicole Zelenski, MD; Lawrence Wells, MD; Apurva Shah, MD
The Children’s Hospital of Philadelphia, Philadelphia, PA

ePoster 28
An Enhanced Weight-Based Cefazolin Prophylaxis Bundle Reduces Surgical Site Infections Following Pediatric Spine Fusion
Ryan Goodwin, MD; Ritika Coelho, MD; David Gurd, MD; Thomas Kuivila, MD; Charles Foster
Cleveland Clinic, Cleveland, OH

ePoster 29
Do We Need Post-Operative Chest Radiographs Following Posterior Spinal Fusion for Adolescent Idiopathic Scoliosis?
Shawn Gilbert, MD; Gerald McGwin, PhD; Robert Esposito, BS; Michael Conklin, MD
University of Alabama Birmingham, Birmingham, AL

ePoster 30
Transitional Care for Pediatric to Adult Special Needs Patients
Philip Nowicki, MD; John Herring, MD
Helen DeVos Children’s Hospital, Grand Rapids, MI

ePoster 31
Establishing a Faculty-Funded Research Center Improves Research Productivity
Robin Baschal, BA; Patrick Carry, MS; Erin Baschal, PhD; Mark Erickson, MD; James Carollo, PhD; Nancy Miller MD
Children’s Hospital Colorado, Aurora, CO

ePoster 32
Predictors of Cost for Posterior Spine Fusion Surgery in Adolescent Idiopathic Scoliosis
William Shaughnessy, MD; Fady Baky; Todd Milbrandt, MD; Scott Echternacht, BA; Hilal Maradit-Kremers, MD; Jeanine Ransom; Dirk Larson; Anthony Stans, MD; A. Noelle Larson, MD
Mayo Clinic, Rochester, MN
ePoster 33  
Standardizing Peri-operative Care of Supracondylar Humerus Fracture Saves Cost and Improves Trainees’ Educational Experience  
**Alvin Su, MD; Mark Lee, MD**  
Connecticut Children’s Medical Center, University of Connecticut, Hartford, CT

ePoster 34  
How Do I Dispose of my Opioid Medication?  
**Christopher Iobst, MD; Satbir Singh, BS; Julie Samora, MD**  
Nationwide Children’s Hospital, Columbus, OH

ePoster 35  
The Cost of Physiologic Referrals to a Pediatric Orthopaedic Clinic  
**Christopher Loftis, MD; John Worley, BA; Daniel Hoernschemeyer, MD; Sumit Gupta, MD**  
University of Missouri, Columbia, MO

ePoster 36  
High Scores on PROMIS Depression Scale Independently Correlated with Pain Scores in a Pediatric Orthopedic Population: Insights Gained from a Patient Reported Outcome (PRO) Program  
**Zhaomin Xu, MD; Judith Baumhauer, MD; P. Cook, MD; James Sanders, MD; Natasha O’Malley, FRCS (Ortho)**  
University of Rochester Medical Center, Rochester, NY

ePoster 37  
Quality of Casting Pediatric Tibial Shaft Fractures: Resident versus Resident with Experienced Assistants  
**Brandi Woo, BS; Tracey Bastrom, MA; Morgan Dennis, BS; Andrew Pennock, MD; Vidyadhar Upasani, MD; Eric Edmonds, MD**  
Rady Children’s Hospital, San Diego, CA

ePoster 38  
Analysis of Cost and Variability in the Surgical Treatment of Adolescent Idiopathic Scoliosis Leads to Opportunities for Cost Savings  
**Suken Shah, MD; Rajiv Rangarajan; Kenneth Rogers, PhD; Peter Gabos, MD; William Mackenzie, MD**  
Nemours/Alfred I duPont Hospital for Children, Wilmington, DE

ePoster 39  
Improvement of Pulmonary Function Measured by Patient-Reported Outcomes in Patients with Non-Idiopathic Scoliosis after Growth-Friendly Instrumentation  
**Anas Minkara, BS; Hiroko Matsumoto, MA; Fay Callejo, MPH; Benjamin Roye, MD; David Roye, MD; Michael Vitale, MD**  
Columbia University Medical Center, New York, NY

ePoster 40  
Short Term HRQoL Results in MCGR and TGR Patients – Divergent from Long Term EOSQ Results in TGR Graduates  
**Charles Johnston, MD; Dong-Phuong Tran, MS**  
Texas Scottish Rite Hospital for Children, Dallas, TX
ePoster 41
Patients’ Perceptions of Breast Asymmetry Improve after Spinal Fusion for AIS
Megan Mignemi, MD; Amy McIntosh, MD
Texas Scottish Rite Hospital for Children, Dallas, TX

ePoster 42
Don’t You Wish You Had Fused to the Pelvis the First Time: A Comparison of Reoperation Rate and Correction of Pelvic Obliquity
Ena Nielsen, BA; Lindsay Andras, MD; Laura Bellaire, MD; Nicholas Fletcher, MD; Anas Minkara, BS; Michael Vitale, MD; Michael Troy, BS; Michael Glotzbecker, MD; David Skaggs, MD
Children’s Hospital Los Angeles, Los Angeles, CA

ePoster 43
African-American Race is Associated with Increased Allogenic Blood Transfusion in Pediatric Scoliosis Surgery
Robert Lark, MD; Kwadwo Owusu-Akyaw, MD; Keila Maher; Mary Cooter; Allison Ross; Brad Taicher, DO
Duke University Medical Center, Durham, NC

ePoster 44
Does Decreased Surgical Stress Really Improve the Psychosocial Health of EOS Patients? A Comparison of TGR and MCGR Patients Reveals Disappointing Results
Cihan Aslan, MD; Z. Deniz Olgun, MD; Gökhân Ayik, MD; Remzi Karaokur; Seniz Ozusta; Gökhan Demirkiran, MD; Fatih Unal, MD; Muharrem Yazici, MD
Hacettepe University, Ankara, Turkey

ePoster 45
Spinopelvic Alignment Affects Health-related Quality of Life (HRQoL) for Patients with Early Onset Scoliosis
Jaime Gomez, MD; Jacob Schulz, MD; Ozren Kubat, MD; Jen Hurry MSc; Alexandra Soroceanu, MD; Tara Flynn; Mayra Tovar, MD; Regina Hanstein, PhD; Virgine Lafage, PhD; Frank Schwab, MD; John Smith, MD; David Skaggs, MD; Ron El-Hawary, MD
Children’s Hospital at Montefiore, Bronx, NY

ePoster 46
Evaluating the Use of Cross-links in Posterior Spinal Fusion in Cerebral Palsy Patients: Do they Affect Radiological Correction, Revision, Infections, and Implant Failures?
Mohammad Usmani, MSc; Suken Shah, MD; Burt Yaszay, MD; Amer Samdani, MD; Patrick Cahill, MD; Peter Newton, MD; Michelle Marks, PT; Paul Sponseller, MD
Johns Hopkins University School of Medicine, Baltimore, MD

ePoster 47
Outcomes of Growing Rods for Severe Early Onset Scoliosis. A Matched Comparative Study with Typical Early Onset Scoliosis
Ilkka Helenius, MD; Hanna Oksanen, RN; Anna McClung, RN; Jeff Pawelek; Muharrem Yazici, MD; Paul Sponseller, MD; John Emans, MD; Francisco Perez-Grueso, MD; George Thompson, MD; Charles Johnston, MD; Suken Shah, MD; Behrooz Akbarnia, MD; Growing Spine Study Group
Turku Children’s Hospital, Turku, Finland

ePoster 48
The Rate and Risk of Curve Progression in Moderate AIS Following Skeletal Maturity
Firoz Miyani, MD, FRCSC; Tracey Bastrom, MA; Amer Samdani, MD; Suken Shah, MD; Baron Lonner, MD; Randal Betz, MD; Peter Newton, MD
BC Children’s Hospital, Vancouver, British Columbia, Canada
ePoster 49
Compliance with Scoliosis Specific Exercises in Adolescent Idiopathic Scoliosis Leads to Lower Risk of Curve Progression and Surgery
Anas Minkara, BS; Amelia Lindgren, MD; Kelly Grimes, DPT; Fay Callejo, MPH; Alexandra Khaleel, MA; Prachi Bakarania, DPT; Hagit Berdishevsky, PT; Hiroko Matsumoto, MA; Benjamin Roye, MD; David Roye, MD; Ahmad Bayomy, MD; Michael Vitale, MD
Columbia University Medical Center, New York, NY

ePoster 50
Reducing Acute Post-Operative Spine Infections: What We Have Done to Make this a Zero Event
Amanda Whitaker, MD; Crystal Seilhamer, FNP-C; Pamela Horn, NP; Juan Mendoza, BS; Laura Gill, MD; Walter Samora, MD; Jan Klarar, MD; Allan Beebe, MD
Nationwide Children’s Hospital, Columbus, OH

ePoster 51
Pelvic Fixation in Cerebral Palsy Scoliosis: Differences Evident at 5 Year Follow Up
Oussama Abousamra, MD; Brian Sullivan, BS; Amer Samdani, MD; Burt Yaszay, MD; Patrick Cahill, MD; Peter Newton, MD; Paul Sponseller, MD
Johns Hopkins Hospital, Baltimore, MD

ePoster 52
Size Matters: Which Adolescent Patients are Most Likely to Require Surgical Decompression for Lumbar Disk Herniation?
Amy McIntosh, MD; Marcel Wiley, MD; Mohammed Khaleel, MD
Texas Scottish Rite Hospital for Children, Dallas, TX

ePoster 53
Side Plank Pose Exercises for Adolescent Idiopathic Scoliosis (AIS) Patients
Natalya Sarkisova, BS; Joshua Yang, BA; David Skaggs, MD; Tracy Zaslow, MD; Bianca Edison, MD; Paul Choi, MD; Vernon Tolo, MD; Lindsay Andras, MD
Children’s Hospital Los Angeles, Los Angeles, CA

ePoster 54
Curve Rigidity is More Important than Curve Magnitude in Predicting Outcomes of Neuromuscular Spinal Deformity Surgery
Ena Nielsen, BA; David Skaggs, MD; Tracy Kovach, MD; Lindsay Andras, MD
Children’s Hospital Los Angeles, Los Angeles, CA

ePoster 55
“Turning the Lights On” for Surgeons: Does It Improve Efficiency and Decrease Cost in the Operating Room for AIS Surgery?
Daniel Sucato, MD; Kaitlyn Brown, MS; Heather Caine, BS; Dong-Phuong Tran, MS
Texas Scottish Rite Hospital for Children, Dallas, TX

ePoster 56
Development of Consensus Based Best Practice Guidelines for Perioperative Management of Blood Loss in Patients Undergoing Posterior Spinal Fusion for Adolescent Idiopathic Scoliosis
Nicholas Fletcher, MD; Michelle Marks, PT; Jahangir Asghar, MD; Steven Hwang, MD; Paul Sponseller, MD; Peter Newton, MD
Emory University, Atlanta, GA
ePoster 57
High Satisfaction in AIS Patients on Accelerated Discharge Protocol
Joshua Yang, BA; David Skaggs, MD; Priscella Chan; Gabriela Villamor, BA; Paul Choi, MD; Vernon Tolo, MD; Catherine Kissinger, RN; Alison Lehman, PA-C; Lindsay Andras, MD
Children’s Hospital Los Angeles, Los Angeles, CA

ePoster 58
Three-Dimensional Analysis of the Sagittal Profile in Surgically Treated Lenke 5 Adolescent Idiopathic Scoliosis
Peter Newton, MD; Kaiying Shen, MD; Burt Yaszay, MD; Madeline Cross, MPH; Megan Jeffords, MS; Carrie Bartley, MA; Tracey Bastrom, MA; Vidyadhar Upasani, MD
Rady Children’s Hospital, San Diego, CA

ePoster 59
A Novel Wound Closure Method in Nonidiopathic Scoliosis Significantly Reduces the Risk of Wound Complications
Michael Vitale, MD; Thomas Imahiyerobo, MD; Anas Minkara, BS; Hiroko Matsumoto, MA; Fay Callejo, MPH; June Ha; Benjamin Roye, MD; David Roye, MD
Columbia University Medical Center, New York, NY

ePoster 60
VEPTR Treatment of Early Onset Scoliosis (EOS) in Children without Rib Abnormalities: Long-Term Results of a Prospective, Multicenter Study
Ron El-Hawary, MD; Kevin Morash, MD; Muayad Kadhim, MD; Michael Vitale, MD; John Smith, MD; Amer Samdani, MD; Jack Flynn, MD; Children’s Spine Study Group
Children’s Hospital of Philadelphia, Philadelphia, PA

ePoster 61
Are There Any Associations Between Back Pain and Adolescent Idiopathic Scoliosis with the Possibility of an Underlying Pathology?
Norman Ramirez-Lluch, MD; Gerardo Olivella, MPH
Hospital La Concepcion, San German, Puerto Rico

ePoster 62
Reduced Physical Activity in Adolescents with Idiopathic Scoliosis Treated with Spinal Bracing Compared to Normal Controls
Todd Milbrandt, MD; Swati Chopra, PhD; A. Noelle Larson, MD; Joline Brandenburg, MD; Christine Huyber; Vickie Treder; Kenton Kaufman, PhD
Mayo Clinic, Rochester, MN

ePoster 63
Functional Motion and Balance Improve after Posterior Spinal Fusion in AIS
Robert Lark, MD; Camille Guzel, BA; Abigail Schmitt, MS; Robert Fitch, MD; Timothy Sell, PT; Benjamin Alman, MD
Duke University Medical Center, Durham, NC

ePoster 64
Neuromonitoring for AIS: A 20-Year Analysis of AIS Patient Incidence of Critical Changes and Predictive Factors to Define Patients at Risk
Daniel Sucato, MD; Kiley Poppino, BS; Alec Thoveson; Steven Sparagana, MD; Patricia Rampy, MS; Ali Parsa, MD
Texas Scottish Rite Hospital for Children, Dallas, TX
ePoster 65
Occipital Plate Cervical Spine Fixation in the Pediatric Population
Daniel Hedequist, MD; Lara Cohen, BS; Brian Yang, BA; Michael Troy, BS; Leah DeWitt, BA; Lawrence Karlin, MD; Brian Snyder, MD; John Emans, MD; Michael Hresko, MD; Michael Glotzbecker, MD
Boston Children’s Hospital, Boston, MA

ePoster 66
Two AIS Spine Surgeries on the Same Day by the Same Surgeon: Is Performance and Outcome the Same for the Second Patient?
Lorena Floccari, MD; Daniel Sucato, MD; Kiley Poppino, BS; Surya Mundluru, MD; Amy McIntosh, MD; Karl Rathjen, MD
Texas Scottish Rite Hospital for Children, Dallas, TX

ePoster 67
Evaluating the Volume-Value Relationship in Adolescent Idiopathic Scoliosis
Sergio Navarro, BS; Anthony Egger, MD; Prem Ramkumar, MD; Ryan Goodwin, MD
Cleveland Clinic Foundation, Cleveland, OH

ePoster 68
Comparison of EOSQ-24 and SRS-22 Scores in Congenital Scoliosis
Ying Li, MD; Michelle Burke, BA; Joel Gagnier, PhD; Michelle Caird, MD; Matthew Abbott, MD; Frances Farley, MD
C.S. Mott Children’s Hospital, University of Michigan, Ann Arbor, MI

ePoster 69
Planned Staged Surgery for Severe Pediatric Spinal Deformity Does Not Reduce Complications Within 90 Days of Surgery: A Prospective Matched Cohort Study
Sumeet Garg, MD; Nikki Bloch, BA; Patrick Carry, MS; Mark Erickson, MD; Patrick Cahill, MD; Amer Samdani, MD; Burt Yaszay, MD; Lawrence Lenke, MD; Brenda Sides, MA; Munish Gupta, MD
Children’s Hospital Colorado, Aurora, CO

ePoster 70
The Impact of Spinal Deformity Surgery on PROMIS Scores in Adolescent Idiopathic Scoliosis Patients: Early Outcomes
Nichelle Enata, ATC; Kirsten Brouillet, BA; Brian Kelly, MD; Munish Gupta, MD; Keith Bridwell, MD; Scott Luhmann, MD
Washington University School of Medicine, St. Louis, MO

ePoster 71
Translaminar C2 Screw Fixation in the Pediatric Population
Brian Yang, BA; Michael Glotzbecker, MD; Michael Troy, BS; Daniel Hedequist, MD
Boston Children’s Hospital, Boston, MA

ePoster 72
In Patients with Cerebral Palsy, Intrathecal Baclofen Correlates with Increased Scoliosis Progression Prior to Posterior Spinal Fusion, but not Scoliosis or Proximal Junctional Kyphosis Progression after Posterior Spinal Fusion
Matthew Halanski, MD; Anatoliy Nechyporenko, BS; Laura Lins ATC; Scott Hetzel, MS; Ken Noonan, MD
University of Wisconsin - School of Medicine and Public Health, Madison, WI
Minimally Invasive Surgery in Neuromuscular Scoliosis: A Superior Approach for Severely Impaired Patients
Vishal Sarwahi, MBBS; Stephen Wendolowski, BS; Jesse Galina, BS; Francisco Laplaza, MD; Yungtai Lo, PhD; Terry Amaral, MD
Cohen Children’s Medical Center, New Hyde Park, NY

Risser 0 AIS Patients: Is There a Difference in Brace Effectiveness Between Lumbar and Thoracic Curves?
John Vorhies, MD; Lori Karol, MD; Daniel Sucato, MD; Donald Virostek; Lesley Butler, MPH; Kiley Poppino, BS; John Herring, MD
Texas Scottish Rite Hospital for Children, Dallas, TX

Fusion Into the Lumbar Spine in Adolescent Idiopathic Scoliosis – The Implications of Disc Disease and Alterations in Lumbar Motion
Michelle Marks, PT; Tracey Bastrom, MA; Baron Lonner, MD; Maty Petcharaphorn, BS; Yuan Ren, PhD; Hussein Nasser, MD; Amer Samdani, MD; Peter Newton MD
Setting Scoliosis Straight, San Diego, CA

Middle Tract Pedicle Stimulation to Ascertain Pedicle Screw Placement
Ignacio Sanpera-Trigueros, MD; Luis Miguel Rodrigalvarez, PhD; Jesus Burgos-Flores
Hospital Universitari Son Esases, Palma de Mallorca, Spain

The Discriminate Ability of the Pediatric Adolescent Shoulder Survey (PASS)
Tracey Bastrom, MA; Andrew Pennock, MD; Eric Edmonds, MD
Rady Children’s Hospital, San Diego, CA

Using the Medial and Lateral Humeral Lines to Guide Intraoperative Fixation of Distal Humerus Physeal Separations
Andrew Chou, BS; Ho Yin Wong, MBBS; Sumanth Gera, MBBS; Arjandas Mahadev, FRCS
KK Women’s and Children’s Hospital, Singapore, Singapore

The AOSpine Thoracolumbar (TL) Spine Injury Classification System: Is It Useful In the Pediatric Spine Trauma Population?
Daniel Hedequist, MD; Michael Glotzbecker, MD; Andrew Mo, MD
Children’s Hospital Boston, Boston, MA

The Effect of the Type of Screw Fixation used in the Treatment of Slipped Capital Femoral Epiphysis
Katie Rooks, MD; Tyler Rudolph, MBChB; Michael Van Der Merwe, MBChB; Haemish Crawford
Starship Children’s Hospital, Auckland, New Zealand
EXPLORE AUSTIN

While visiting Austin, take advantage of several distinct entertainment districts offering about 200 live music venues. There are many great restaurants, shops, and local attractions walking distance of the Marriott.

Visit: austintexas.org | 6street.com | raineystreetbars.com | 2ndstreetdistrict.com

RESTAURANTS

- Fareground (located across from the JW Marriott)
- Cooper’s Old Time Pit Bar-B-Que Austin (next to hotel)
- Terry Black’s Barbecue
- Matt’s El Rancho
- Maudie’s
- Jacoby’s
- Second Bar + Kitchen (across from hotel)

ENTERTAINMENT DISTRICTS

- South Congress
- Rainey Street
- 2nd Street/Warehouse District
- West 6th Street
- East 6th Street (East of IH-35)
- South Lamar

LIVE MUSIC

- Saxon Pub
- Elephant Room
- The Continental Club
- Stubb’s
- Cedar Street Courtyard
- Broken Spoke (Texas style Honky-Tonk)

MUSEUMS

- Bullock Texas State History Museum
- Lyndon Baines Johnson Library and Museum
- Blanton Museum of Art
- Texas State Capitol

SHOPPING

- The Domain (upscale and mainstream retail and restaurants in outdoor setting)
- South Congress Ave. (individual shops)
- 2nd Street District (boutiques and shops in Downtown)
- San Marcos Premium Outlets (35 minute drive to San Marcos, TX)

Western Wear:
- Allens Boots
- Cavender’s Boot City

AquaCast Liner

AquaCast® Liner manufactures a complete line of waterproof cast padding and liners used in fracture care, replacing the old WL Gore Procel® and PANTALOON® products. Our newly remodeled Hipster® protective liner, used for hip and shoulder spicas, femur fractures and other body casts, makes application quicker and easier, reduces skin excoriation, and improves patient satisfaction – while lowering overall costs simultaneously. Stop by our table to review the new design and also see why pediatric orthopaedic surgeons and non-operating doctors prefer our “easier-to-apply” rolls over the Gore® Procel.

Biogen

Through cutting-edge science, Biogen discovers, develops and delivers to patients worldwide therapies for the treatment of neurodegenerative and rare diseases.

Children’s Hospital of Los Angeles

The mission of Children’s Hospital Los Angeles is to create hope and build healthier futures. Founded in 1901, CHLA is the top-ranked children’s hospital in California and among the top 10 in the nation, according to the prestigious U.S. News & World Report Honor Roll of children’s hospitals for 2017-18. The hospital is home to The Saban Research Institute and is one of the few freestanding pediatric hospitals where scientific inquiry is combined with clinical care devoted exclusively to children. Children’s Hospital Los Angeles is a premier teaching hospital and has been affiliated with the Keck School of Medicine of the University of Southern California since 1932.

CURE International

We are a non-profit organization that operates charitable hospitals and programs in 29 countries worldwide where patients experience the life-changing message of God’s love for them, receiving surgical treatment regardless of gender, religion, or ethnicity. CURE’s efforts are focused on providing medical care to children suffering primarily from orthopedic and neurological conditions.

DIERS

DIERS Medical Systems is an innovative company offering a radiation-free system for assessment of the spine and trunk. Using surface topography, the DIERS formetric system can provide a 3-D reconstruction of the spine as a static measurement or while the spine is in motion. The addition of lower extremity video analysis and foot pressure measurements from the integrated treadmill turns the spine system into a fully functional compact gait lab. The DIERS formetric system provides reliable outcomes data for clinicians who treat patients with scoliosis, kyphosis, neuromuscular disorders, gait abnormalities, or sports injuries.
DePuy Synthes Companies

DePuy Synthes Companies part of the Johnson & Johnson family of companies provides the most comprehensive orthopaedic and neurological solutions in the world. The company offers an unparalleled breadth of products, services, programs and research and development capabilities. DePuy Synthes Companies’ solutions in the specialties of joint reconstruction, trauma, neurological, craniomaxillofacial, spinal surgery and sports medicine are designed to advance patient care while delivering clinical and economic value to health care systems worldwide.

EOS Imaging

EOS imaging designs, develops and markets advanced imaging and image-based solutions for musculoskeletal pathologies and orthopedic surgical care. The EOS platform connects imaging to care by adding value along the entire patient care pathway from diagnosis to follow-up. Low dose and Micro Dose EOS exams provide full body, stereo-radiographic images in weight-bearing positions. The biplanar images are acquired simultaneously in less than 20 seconds without magnification. The accompanying sterEOS workstation generates patient-specific 3D models, calculates over 100 clinical parameters and offers customizable patient reports. EOS imaging also provides 3D Services and 3D surgical planning solutions for spine, hip and knee.

Global Help

Global HELP creates, distributes, and compiles free, relevant, non-commercial healthcare information that prioritizes affordable and effective healthcare solutions and promotes sustainability. The organization’s long-term goal is to create sustainable improvement in healthcare throughout the world by helping people help themselves.

Globus Medical

Globus Medical, Inc. is a leading musculoskeletal solutions company and is driving significant technological advancements across a complete suite of spinal products. Founded in 2003, Globus’ single-minded focus on advancing spinal surgery has made it the fastest growing company in the history of orthopedics. Globus is driven to utilize superior engineering and technology to achieve pain free, active lives for all patients with spinal disorders.

Implanet

Implanet is a global company with a singular focus to provide novel solutions to complex spinal pathologies through the use of the JAZZ™ polyester band system. The JAZZ Band & Frame hybrid approach for complex deformity correction has been shown to reduce implant volume, decrease surgical cost, and reduce blood loss and OR time while demonstrating significant improvement in Sagittal Balance. JAZZ Lock is the first, and only, rodless band fixation device. JAZZ Lock allows for rapid posterior fixation of spinal fractures, is a low-profile tension band for top-of-construct protection and provides additional fixation options in compromised bone.
International Hip Dysplasia Institute

The International Hip Dysplasia Institute (IHDI) is a not-for-profit effort to improve the health and quality of life for those afflicted with hip dysplasia. The IHDI is supported by the Arnold Palmer Hospital Foundation in Orlando, Florida, with major sponsorship from Dan Whitney (“Larry the Cable Guy”) and his wife, Cara. With this combined effort, we have joined forces with several noted medical centers around the world to promote prevention, diagnosis, and treatment of hip dysplasia.

Inion

Inion is a medical device company focused on the development and commercialization of innovative biodegradable and bioactive implants for Spinal, Specialty Orthopaedic and Craniomaxillofacial applications. Inion’s proprietary blending technology enables application specific implants which have ‘custom-fit’ capabilities for patients that do not interfere with imaging.

Integrity Surgical Sales

Integrity surgical sales is the premier surgical distribution company in Texas, Louisiana and Mississippi. We are a surgical product distributor serving the medical and surgical community representing the Manufacturers’ Alafair Biosciences Inc, who develops cross-linked polysaccharide hydrogel films for the post-surgical complication of adhesion or tethering between opposing tissue surfaces. Leica Microsystems is a manufacturer of optical microscopes, equipment for the preparation of microscopic specimens and related products. There are ten plants in eight countries with distribution partners in over 100 countries. Leica Microsystems has been thriving for the past 19 years. Leica Surgical Microscopes and 7D surgical Leading the way in image guided surgeries.

JCO

The Journal of Children’s Orthopaedics (JCO) is the official journal of the European Paediatric Orthopaedic Society (EPOS) and is published by The British Editorial Society of Bone & Joint Surgery. It provides a forum for the advancement of the knowledge and education in paediatric orthopaedics and traumatology across geographical borders. JCO publishes high quality, peer-reviewed articles that focus on clinical practice, diagnosis and treatment of disorders unique to paediatric orthopaedics, as well as on basic and applied research. JCO is open access, and is abstracted/indexed in PubMed (with full text in PubMed Central), Google Scholar, SCOPUS and Web of Science, and is included in the Early Sources Citation Index (ESCI).
K2M

K2M Group Holdings, Inc. is a global leader of complex spine and minimally invasive solutions focused on achieving three-dimensional Total Body Balance™. Since its inception, K2M has designed, developed and commercialized innovative complex spine and minimally invasive spine technologies and techniques used by spine surgeons to treat some of the most complicated spinal pathologies. K2M has leveraged these core competencies into Balance ACS™, a platform of products, services, and research to help surgeons achieve three-dimensional spinal balance across the axial, coronal and sagittal planes, with the goal of supporting the full continuum of care to facilitate quality patient outcomes. The Balance ACS platform, in combination with the Company’s technologies, techniques and leadership in the 3D-printing of spinal devices, enable K2M to compete favorably in the global spinal surgery market.

Medtronic

Medtronic
Further, Together

As a global leader in medical technology, services and solutions, Medtronic improves the lives and health of millions of people each year. We use our deep clinical, therapeutic, and economic expertise to address the complex challenges faced by healthcare systems today. Let’s take healthcare Further, Together. Visit our booth to learn more about our innovative solutions.

Merete Technologies, Inc.

Merete is Innovation. Our stated aim is to discover and react to market demands at any time. As a manufacturer, the health and the mobility of the patient is top priority. We offer an increasing product portfolio for foot and ankle surgery, the treatment of major bone defects in oncology as well as trauma, hip revision and pediatric implants. Our latest innovation for simpler and faster guided growth and growth arrest is PediatrOS FlexTack™ and RigidTack™. These novel staples correct leg length discrepancies and angular deformities through improved temporary epiphysiodesis. Merete’s PediatrOS staples offer a safer and more effective alternative for your patients.

NuVasive, Inc.

NuVasive is transforming spine surgery and beyond with minimally invasive, procedurally-integrated solutions designed to deliver reproducible and clinically-proven surgical outcomes. The Company’s portfolio includes access instruments, implantable hardware, biologics, software systems for surgical planning, navigation and imaging solutions, magnetically adjustable implant systems for spine and orthopedics, and intraoperative monitoring service offerings.

OrthoPediatrics Corp.

Founded in 2006, OrthoPediatrics is an orthopedic company focused exclusively on providing a comprehensive product offering to the pediatric orthopedic market to improve the lives of children with orthopedic conditions. OrthoPediatrics currently markets 24 surgical systems that serve three of the largest categories within the pediatric orthopedic market. This offering spans trauma & deformity, scoliosis, and sports medicine/other procedures. OrthoPediatrics’ global sales organization is focused exclusively on pediatric orthopedics and distributes its products in the United States and 35 countries outside the United States.
EXHIBITOR LISTING, CONTINUED

Pega Medical

For more than two decades, Pega Medical has been offering innovative deformity correction solutions. Pega’s family of IM Nails (Fassier-Duval Telescopic Rod, SLIM and GAP Endo-Exo Medullary Systems) are specifically designed for small bones, often seen with metabolic and genetic disease. Additional products such as the Hinge Plate and the Free-Gliding SCFE Screw complete our portfolio of growth modulating orthopedic devices. For limb deformity and length discrepancy, the Paley’s Osteotomy System offers unique instrumentation for complex procedures. Our latest innovation: The LolliPOP modular hip plating system, completes a portfolio of forward thinking technologies developed in collaboration with expert orthopedic surgeons from POSNA and from around the world.

Rubin Institute for Advanced Orthopaedics

Rubin Institute for Advanced Orthopedics (RIAO) is home to some of the world’s most renowned orthopedic surgeons and offers state-of-the-art treatment in a variety of orthopedic services for children and adults. The Institute hosts an annual CME-accredited course in limb deformity correction and lengthening. Clinical and research fellowship opportunities are available. The Multiplier and Bone Ninja apps were developed here. The RIAO is located in Baltimore, Maryland, USA.

Setting Scoliosis Straight

Setting Scoliosis Straight is a not-for-profit charitable foundation that was established in 2008. Its purpose is to conduct fundraising efforts in support of the Harms Study Group, with a goal to further support and advance techniques in the treatment of spinal deformities in children and adolescents.

Spineart

Spineart is one of the fastest growing privately held spine companies, with a leading position in the European market and representation in more than 46 countries worldwide. Spineart established its US presence in 2009, providing to distributors, hospitals and surgeons a unique offer: Sterile-packed, barcoded implants and a compact set philosophy. Spineart introduced clinically validated technologies in Minimally Invasive Surgery, Motion Preservation, Fusion, Biologics, and Fractures Treatment.

Stryker Spine

Our Spine division offers a comprehensive portfolio for orthopaedic and neurosurgeons specializing in the surgical treatment of spinal pathologies. Our continually expanding portfolio features complete procedural solutions for the spine spanning from the occiput to the pelvis, including a full suite of LiTe (Less Invasive Technology) procedures such as the LiTe TLIF, LiTe LIF and LiTe ALIF. By teaming up with our sister divisions, we have been able to add navigation and power capabilities to many of our spinal fixation systems including Serrato, Xia 3, Xia 4.5 and ES2. We recently launched our first 3D printed porous titanium interbody devices, the Tritanium PL, TL and Tritanium C Cages. These cages are manufactured using Stryker’s proprietary Tritanium In-Growth Technology, a novel highly porous titanium material designed for bone in-growth and biological fixation. We plan to expand the use of this unique technology over the next few years.
EXHIBITOR LISTING, CONTINUED

**Ultragenyx**

Ultragenyx Pharmaceutical Inc. is a clinical-stage biopharmaceutical company in Novato, California, founded in 2010 by Emil Kakkis, MD, PhD, committed to bringing to market novel products for the treatment of rare and ultra-rare diseases, with a focus on serious, debilitating genetic diseases. Our focus is on improving the lives of patients around the world who have no approved therapies for their diseases through transforming good science into great medicine for rare diseases.

**WishBone**

WishBone Medical is a Warsaw, Indiana, based pediatric orthopedic company focused globally on the unmet needs of children suffering from orthopedic issues. Our commitment is to provide anatomically appropriate, innovative implants and instruments in sterile packed, single-use, disposable kits to surgeons and their patients who are still growing. Because KIDS are not just little adults.

**Wolters Kluwer**

Wolters Kluwer Health is a leading global provider of information and point of care solutions for the healthcare industry. Our solutions are designed to help professionals build clinical competency and improve practice so that healthcare organizations can succeed in value-based care delivery models. Product solutions include Lippincott, Ovid®, and UpToDate®.

**Wright Medical**

Wright Medical Group N.V. is a global medical device company focused on Extremities and Biologics. We deliver innovative, value-added solutions improving quality of life for patients worldwide. We are a recognized leader of surgical solutions for the upper extremities (shoulder, elbow, wrist and hand), lower extremities (foot and ankle) and biologics markets, three of the fastest growing segments in orthopaedics.

**Zimmer Biomet**

Zimmer Biomet Spine is a leader in restoring mobility, alleviating pain, and improving the quality of life for patients around the world by delivering surgeons a comprehensive portfolio of quality spine technologies and procedural innovation, best-in-class training, and unparalleled service via a network of responsive team members and sales professionals.
POSNA ANTITRUST POLICY

It shall be the policy of the Pediatric Orthopaedic Society of North America (POSNA) to be in strict compliance with all Federal and State Antitrust laws, rules and regulations. Therefore: These policies and procedures apply to all membership, board, committee, and all meetings attended by representatives of the POSNA.

Discussions at POSNA meetings often cover a broad range of topics pertinent to the interests or concerns of orthopaedic surgeons. As a general rule, except as noted below, discussions at POSNA meetings can address topics without raising antitrust concerns if the discussions are kept scrupulously free of even the suggestion of private regulation of the profession. However, a number of topics that might be (and have been) discussed at POSNA meetings may raise significant complex antitrust concerns. These include:

• Membership admissions, rejections, restrictions, and terminations;
• Method of provision and sale of POSNA products and services to non-members;
• Restrictions in the selection and requirements for exhibitors at the POSNA Annual Meeting or in CME activities;
• Collecting and distributing certain orthopaedic practice information, particularly involving practice charges and costs;
• Obtaining and distributing orthopaedic industry price and cost information;
• Professional certification programs;
• Group buying and selling; and
• Inclusions or exclusion of other medical societies in organizational activities or offerings.

When these and related topics are discussed, the convener or members of the POSNA group should seek counsel from its General Counsel.

POSNA urges its Board, committees and other groups not to participate in discussions that may give the appearance of or constitute an agreement that would violate the antitrust laws. Notwithstanding this reliance, it is the responsibility of each POSNA Board or committee member to avoid raising improper subjects for discussion. This policy has been prepared to ensure that POSNA members and other participants in POSNA meetings are aware of this obligation.

The “Do Not’s” and “Do’s” presented below highlight only the most basic antitrust principles. POSNA members and others participating in POSNA meetings should consult with the General Counsel in all cases involving specific questions, interpretations or advice regarding antitrust matters.

Do Nots

1. Do not, in fact or appearance, discuss or exchange information regarding:
   a. Individual company prices, price changes, price differentials, mark-ups, discounts, allowances, credit terms, etc. or any other data that may bear on price, such as costs, production, capacity, inventories, sales, etc.
   b. Raising, lowering or “stabilizing” orthopaedic prices or fees;
   c. What constitutes a fair profit or margin level;
   d. The availability of products or services; or
   e. The allocation of markets, territories or patients.
2. Do not suggest or imply that POSNA members should or should not deal with certain other persons or companies.
3. Do not foster unfair practices regarding advertising, standardization, certification or accreditation.
4. Do not discuss or exchange information regarding the above matters during social gatherings, incidental to POSNA-sponsored meetings.
5. Do not make oral or written statements on important issues on behalf of POSNA without appropriate authority to do so.
POSNA ANTITRUST POLICY, CONTINUED

The Do's

1. Do adhere to prepared agenda for all POSNA meetings. It is generally permissible for agendas to include discussions of such varied topics as professional economic trends, advances and problems in relevant technology or research, various aspects of the science and art of management, and relationships with local, state or federal governments.

2. Do object whenever meeting summaries do not accurately reflect the matters that occurred.

3. Do consult with General Counsel on all antitrust questions relating to discussions at POSNA meetings.

4. Do object to and do not participate in any discussions or meeting activities that you believe violate the antitrust laws; dissociate yourself from any such discussions or activities and leave any meeting in which they continue.

Special Guidelines for Collecting and Distributing Information

The collection and distribution of information regarding business practices is a traditional function of associations and is well-recognized under the law as appropriate, legal and consistent with the antitrust laws. However, if conducted improperly, such information gathering and distributing activities might be viewed as facilitating an express or implied agreement among association members to adhere to the same business practices. For this reason, special general guidelines have developed over time regarding association’s reporting on information collected from and disseminated to members. Any exceptions to these general guidelines should be made only after discussion with General Counsel. These general guidelines include:

1. Member participation in a statistical reporting program is voluntary. A statistical reporting program should be conducted without coercion or penalty. Non-members should be allowed to participate in a statistical reporting program if eligible; however, if a fee is involved, non-members may be charged a reasonably higher fee than members.

2. Information should be collected via a written instrument that clearly sets forth what is being requested.

3. The data that is collected should be about past transactions or activities; particularly if the survey deals with prices and price terms (including charges, costs, wages, benefits, discounts, etc.), it should be historic, i.e., more than three months old.

4. The data should be collected by either POSNA or an independent third party not connected with any one member.

5. Data on individual orthopaedic surgeons should be kept confidential.

6. There should be a sufficient number of participants to prevent specific responses or data from being attributable to any one respondent. As a general rule, there should be at least five respondents reporting data upon which any statistic or item is based, and no individual's data should represent more than 25% on a weighted average of that statistic or item.

7. Composite/aggregate data should be available to all participants – both members and non-members. The data may be categorized, e.g., geographically, and ranges and averages may be used. No member should be given access to the raw data. Disclosure of individual data could serve to promote uniformity and reduce competition.

8. As a general rule, there should be no discussion or agreement as to how members and non-members should adjust, plan or carry out their practices based on the results of the survey. Each member should analyze the data and make business decisions independently.

LEADERS IN PEDIATRIC ORTHOPEDIC EDUCATION, RESEARCH AND TREATMENT

Texas Children’s Hospital Orthopedic Surgery is focused on delivering cutting-edge care for children now and for generations to come. Our experts provide care for the full spectrum of pediatric musculoskeletal conditions, offering the best of modern-day treatment options and looking to the future through advanced research and the education of tomorrow’s providers.

Our facilities span the entire Greater Houston area, including six community health centers, a 3,000 square foot sports performance gym at Texas Children’s Hospital West Campus and the Human Performance Center for Motion and Gait Analysis at Texas Children’s Hospital The Woodlands.

Our team of 21 pediatric orthopedic surgeons:
• Sees over 38,000 outpatient clinic visits
• Performs over 2,600 OR cases
• Trains 3 pediatric orthopedic surgery fellows and 2 pediatric orthopedic physician assistant fellows
