

Made with ♥ for Learners

Contact your Program Coordinator if you cannot find an option you need. They maintain the Procedure Logger module.

Log Procedure on New Innovations Mobile App

The most convenient way to log procedures: [logging in the mobile app](#)

Log Procedure on Desktop

To log a procedure, follow these steps:

1. Go to **Logger > Procedure > Add** tab
2. Complete the necessary fields. Those with a red asterisk are required.
3. To save the procedure, you have various options:
 - **Add Procedure** - Allows you to add another procedure for this same patient for the same day. Once you have added all procedures, click Save or Save & Retain.
 - **Save** - Saves this procedure and refreshes the page so you can enter a new procedure
 - **Save and Retain** - Saves this procedure and retains the procedure information so you can enter the same procedure for a different patient

The screenshot shows the 'Log Procedure' web application interface. The form is titled 'Log Procedure' and has tabs for 'Add', 'Confirm', and 'View'. The form contains various input fields for patient information, visit type, date performed, location, group, procedure, supervisor, role, diagnosis, clinical conditions, consent, patient statistics, and service type. At the bottom, there are buttons for 'Save', 'Save & Retain', and 'Cancel', along with a 'View Log Listing' link.
